Subject: Request for withholding from public disclosure the schematics, block diagrams, operational description and internal photos pursuant to an application for certification

Gentlemen:

We, RF Digital Corporation, would like to request that all schematics, block diagrams, operational descriptions, and internal photos submitted with the application for certification be withheld from public disclosure as per Section 0.459 of FCC Rules.

The device is fully encapsulated using high pressure injection mold. The encapsulation cannot be removed without destroying the part, therefore we also would like the internal photos to be held from public disclosure.

This request is made under the provisions of Section 0.457 (d) of the Commission's Rules, and Section 552 (b)(4) of the Freedom of Information Act. These sections authorize the withholding from public inspection, those materials which would be privileged as a matter of law if retained by the person submitting them, and materials which would not customarily be released to the public by that person.

If you have any questions, please do not hesitate to contact us at 949-610-0008

Sincerely,

Armen Kazanchian  
President
