DATED 08 November 2012

This report has been up-issued to Issue 2 to correct the FCC ID.

ENGINEERING STATEMENT

The measurements shown in this report were made in accordance with the procedures described on test pages. All reported testing was carried out on a sample equipment to demonstrate limited compliance with FCC CFR 47 Part 80. The sample tested was found to comply with the requirements defined in the applied rules.

Test Engineer(s);

REPORT SUMMARY

FCC Testing of the
SRT Marine Technology Ltd AIS-SART Mercury 409-0002
In accordance with FCC CFR 47 Part 80

Product Service

1.1 INTRODUCTION

The information contained in this report is intended to show verification of the FCC Testing of the SRT Marine Technology Ltd AIS-SART Mercury 409-0002 to the requirements of FCC CFR 47 Part 80.

Objective	To perform FCC and Industry Canada Testing to determine the Equipment Under Test's (EUT's) compliance with the Test Specification, for the series of tests carried out.
Manufacturer	SRT Marine Technology Ltd
Model Number(s)	409-0002
Serial Number(s)	40900023120003 – MMSI: 970460003 40900023120010 – MMSI: 970460010 40900023120009 – MMSI: 970460009
Number of Samples Tested	3
Test Specification/Issue/Date	FCC CFR 47 Part 80 (2011)
Incoming Release Date	Application Form 03 September 2012
Disposal Reference Number Date	Held Pending Disposal Not Applicable Not Applicable
Order Number Date	POR002829 19 December 2011
Start of Test	10 August 2012
Finish of Test	27 September 2012
Name of Engineer(s)	M Russell B Airs S Bennett T Guy

1.2 BRIEF SUMMARY OF RESULTS

A brief summary of the tests carried out in accordance with FCC CFR 47 Part 80 is shown below.

Section	Spec Clause	Test Description	Result	Comments/Base Standard
Transmit				
2.1	80.205	Bandwidths	Pass	
2.2	80.209	Transmitter Frequency Tolerances	Pass	
2.3	80.211	Emission Limitations	Pass	
2.4	80.213	Modulation Requirements	Pass	
2.5	80.213 (a)(2)	Transmitter Frequency Deviation	Pass	
2.6	80.215	Transmitter Power	Pass	
2.8	80.215 (e)(g)(1)(2)(3)	Transmitter Carrier Power Reduction	Pass	
Idle				
2.7	80.217 (b)	Suppression of Interface Aboard Ships	Pass

1.4 PRODUCT INFORMATION

1.4.1 Technical Description

The Equipment Under Test (EUT) was a SRT Marine Technology Ltd AIS-SART Mercury 409-0002. A full technical description can be found in the manufacturer's documentation.

1.5 TEST CONDITIONS

For all tests the EUT was set up in accordance with the relevant test standard and to represent typical operating conditions. Tests were applied with the EUT situated in a shielded enclosure.

The EUT was powered from a 6 V DC supply.

FCC Accreditation
90987 Octagon House, Fareham Test Laboratory

1.6 DEVIATIONS FROM THE STANDARD

No deviations from the applicable test standards or test plan were made during testing.

1.7 MODIFICATION RECORD

Modification State	Description of Modification still fitted to EUT	Modification Fitted By	Date Modification Fitted

SECTION 2

TEST DETAILS

FCC Testing of the
SRT Marine Technology Ltd AIS-SART Mercury 409-0002
In accordance with FCC CFR 47 Part 2, FCC CFR 47 Part 80

2.1 BANDWIDTHS

2.1.1 Specification Reference

FCC CFR 47 Part 80, Clause 80.205

2.1.2 Equipment Under Test and Modification State

409-0002 S/N: 40900023120003 – MMSI: 970460003 - Modification State 0

2.1.3 Date of Test

10 August 2012

2.1.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.1.5 Test Procedure

The EUT was connected to a spectrum analyser via a cable and attenuators. The EUT was configured to transmit three different packet data loads at maximum power.

The trace was set to max hold until a sufficient number of sweeps was observed. The 99% occupied bandwidth function was selected on the spectrum analyser and the result and the trace were recorded.

2.1.6 Environmental Conditions

Ambient Temperature	22.7°C
Relative Humidity	38.6%

2.1.7 Test Results

Limit Clause

(d) The nominal authorised channel bandwidth for voice is 20 kHz
(e) For data modulation, an authorised bandwidth of 16 kHz is permitted.
± 5 KHz.

2.2 TRANSMITTER FREQUENCY TOLERANCES

2.2.1 Specification Reference

FCC CFR 47 Part 80, Clause 80.209

2.2.2 Equipment Under Test and Modification State

409-0002:2 S/N: 40900023120010 – MMSI: 970460010 - Modification State 1

2.2.3 Date of Test

20 September 2012

2.2.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.2.5 Test Procedure

The EUT was connected to a spectrum analyser via a 30 dB attenuator with an external high stability frequency reference connected.

The EUT was transmitted unmodulated and the trace set to max hold with a 100 Hz resolution bandwidth.

The marker was then used to measure the peak response and the result recorded in the table on the following page.

The EUT was connected to a spectrum analyser via a 30 dB attenuator with an external high stability frequency reference connected. The EUT was transmitted unmodulated and the trace set to max hold with a 100 Hz resolution bandwidth. The marker was then used to measure the peak response and the result recorded in the table on the following page.

161.975 MHz	-112
162.025 MHz	112

Limit Clause

No limit is defined 80.209. Therefore limit from ITU 1371 is used.

±3ppm.

2.3 EMISSION LIMITATIONS

2.3.1 Specification Reference

FCC CFR 47 Part 80, Clause 80.211

2.3.2 Equipment Under Test and Modification State

409-0002:2 S/N: 40900023120010 – MMSI: 970460010 - Modification State 1

2.3.3 Date of Test

13 September 2012, 19 September 2012 & 25 September 2012

2.3.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.3.5 Test Procedure

Conducted

The EUT transmitting on full power, was connected to a Spectrum Analyser via 50dB of attenuation in the 9kHz – 300MHz frequency range and via a 30dB attenuator with 300MHz High Pass Filter in the 300MHz – 2GHz frequency range.

The EUT was checked (for bottom and top channels of the EUT) against the specification limit for all emissions >250% removed from the assigned frequency, between 9kHz – 2GHz frequency range.

The Path Loss for each frequency range was recorded and the worst case loss was entered as a Reference Level Offset.

Product Service

Radiated

A preliminary profile of the Spurious Radiated Emissions was obtained up to the 10th harmonic by operating the EUT on a remotely controlled turntable within a semi-anechoic chamber. Measurements of emissions from the EUT were obtained with the Measurement Antenna in both Horizontal and Vertical Polarisations. The profiling produced a list of the worst-case emissions together with the EUT azimuth and antenna polarisation.

Using the information from the preliminary profiling of the EUT, the list of emissions was then confirmed or updated under Alternative Open Site conditions. Emission levels were maximised by adjusting the antenna height, antenna polarisation and turntable azimuth.

The EUT was set to transmit on maximum power with both channels operating simultaneously.

For any emissions found the EUT was then removed from the chamber and replaced with a substitution antenna. Using a signal generator the level was adjusted to achieve the same value on the measuring instrument as previously recorded with the EUT. The final result was determined by a calculation using the signal generator level, antenna gain and cable loss.

The measurements were performed at a 3m distance unless otherwise stated.

Mast Controller	maturo Gmbh	NCD	3917	-	TU
Low Noise Amplifier	Wright Technologies	APS04-0085	3969	-	TU

TU – Traceability Unscheduled
O/P MON – Output Monitored with Calibrated Equipment

Product Service

3.2 MEASUREMENT UNCERTAINTY

For a 95% confidence level, the measurement uncertainties for defined systems are:-

Test Discipline	MU
Transmitter Power	± 0.70 dB
Transmitter Frequency Tolerances	± 11 Hz
Emission Limitations	Radiated: ± 3.08 dB Conducted: ± 3.454 dB
Bandwidths	± 58.05 Hz
Modulation Requirements	± 1.2 dB
Suppression of Interface Aboard Ships	-
Transmitter Carrier Power Reduction	-
Transmitter Frequency Deviation	± 88.5 Hz

UKAS TESTING 0141

This report relates only to the actual item/items tested.

Our UKAS Accreditation does not cover opinions and interpretations and any expressed are outside the scope of our UKAS Accreditation.

Results of tests not covered by our UKAS Accreditation Schedule are marked NUA (Not UKAS Accredited).
