

08.07.2025

The following changes to the certificated equipment with the FCC ID V2T-EDH2507 were made:

- Problems during EMI radiation tests in between 70 to 120 MHz.
  - Counter measurement: Additional 1k resistor and 220 pF.
- Problems during the EMI immunity test for the test-frequencies „MT“(Mobile Transmitter).
  - Counter measurement: Additional 10k resistor.
- Changes do not affect the NFC Radio Part
- A software update is necessary to implement a product robustness measure to improve and stabilize the card detection

Sincerely,

Mr. Kay Lackmann
