

CPS Telecom Limited

6/F, Building A, Xinghong Science Park, No.111 of Shuiku Rd., Fenghuanggang,
Xixiang, Bao'an, Shenzhen, China

Label Statement

Date: April 28, 2017

We state that the label of our device, FCC ID: V49CP228 will be put in the battery compartment.

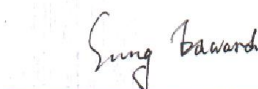

The subject transceiver is a compact handheld model, authorized under 47CFR Part 95 for FRS and GMRS services.

Because the majority of the transceiver housing is composed of display, speaker, operating controls, and a battery access cover, there is extremely limited space available to attach the required label carrying the FCC ID. Attaching the label to the battery access cover is not acceptable because the battery access cover is a removable item. For this reason, CPS Telecom Limited proposes placing the label carrying the FCC identifier inside the battery compartment.

The consumer packaging for these models includes the batteries as separate items, NOT installed in the radio. As such, the FCC ID will be readily visible to the user before the batteries are installed and whenever the batteries are removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a transparent plastic "clamshell" but, because the battery access cover is installed on the radio, the battery compartment cannot be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), CPS Telecom Limited will add the FCC ID "V49CP228" to the insert card within the clamshell packaging.
