

INSTRUCTION SHEET

To Set Up:

1. Remove the Snuggle Bear and Remote Bear Light from the packaging. Dispose of all plastic ties before giving to child.
2. Open battery box door on the underside of the Remote Bear Light with a Phillips screwdriver and install 3 fresh AA Alkaline batteries as shown on the diagram. Close the battery box door and tighten the battery door screw.
3. Open the Velcro opening on the back of the Snuggle Bear to reveal the battery box. Open the battery box door and insert 3 fresh AA Alkaline batteries also as above. See diagram. Close the battery box door and tighten the battery door screw.
4. Both the Snuggle Bear and Remote Bear Light have a small system switch next to the battery box door. Make sure both are set to the "C" position.

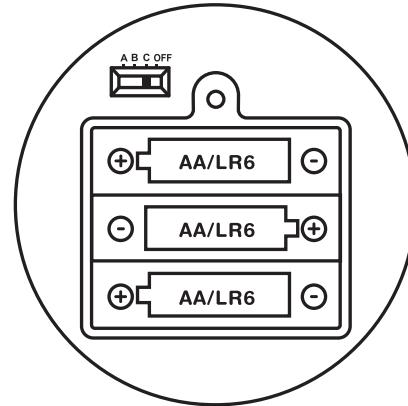

To Operate:

- Press on the star of the Snuggle Bear. The star will light up and will send a signal to turn on the Remote Bear light.
- To turn off the light on both bears, press on the star again. Otherwise the bear lights will dim and turn off automatically after 15 minutes.
- The Remote Bear light can also be turned on/off manually by pressing down on the top front of the cloud base.

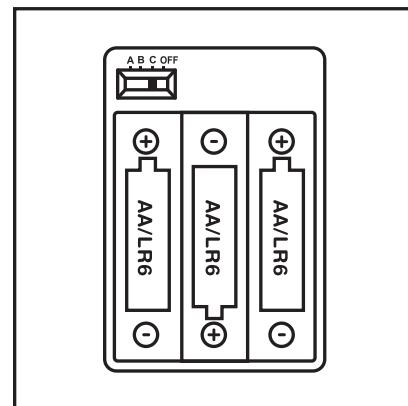

Troubleshooting:

If the star does not light up when pressed OR if the Remote Bear Light does not turn on after the star lights up OR if the Remote Bear Light seems to turn on by itself...

1. Make sure the system switch position is not in the OFF position on either the Snuggle bear or the Remote Bear Light.
2. Check to make sure the system switches on both bears are set to the same letter position: both on A, or both on B, or both on C. (If you have other Step 'n Shine systems in your house, you may need to set to one of the other letter positions to make sure the systems don't interfere).
3. Replace all batteries with fresh AA Alkaline batteries.

Remote Light Battery Box

Plush Bear Battery Box

Note: The lighting system is designed to provide low-level lighting for dark rooms. The light may appear dim or even off in a brightly lit room.

The Snuggle 'n Shine product uses high frequency radio waves to communicate from the Snuggle Bear to the Remote Bear Light. These radio waves can be affected by building materials, water pipes, appliances and other devices such as wireless telephones. Usually, moving either the Snuggle Bear or the Remote Bear Light even a few inches will improve the signal. Without interference the product has been shown to operate up to 100 feet.

Care and Maintenance:

- Both the plush Snuggle Bear and the Remote Bear Light can be cleaned by wiping with a damp cloth.
- Do not submerge in water.
- Do not use outdoors or where the unit may get damp.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following conditions:

- [1] This device may not cause harmful interference, and
- [2] this device must accept any interference received, including interference that may cause undesired operation.

Modifications, not expressly approved by Step 'n Shine, LLC for compliance, could void the user's authority to operate the equipment.

BATTERY SAFETY INFORMATION

- Use only fresh AA Alkaline batteries.
- Do not use rechargeable batteries.
- Batteries are to be inserted with the correct polarity.
- Replace all batteries of a set at the same time.
- Clean the battery contacts and also those of the device prior to battery installation.
- Remove batteries from equipment which is not to be used for an extended period of time.
- Do not mix alkaline, standard (Carbon-zinc) or rechargeable batteries (Nickel-Cadmium Batteries).
- Exhausted batteries are to be removed promptly.
- Dispose of batteries safely.

Save these instructions for future reference as they contain important information.
