

ZB110 Labeling Details

Line1: MOD: = Model Type

Model: ZB110	Basic Wireless Keypad (included for all models)
Model: ZB110(P)	Sounder Option included
Model: ZB110(T)	Temperature and Humidity Option included
Model: ZB110(TL)	Temperature and Humidity with Logging Option included
Model: ZB110(A)	Accelerometer Option included
Model: ZB110(AL)	Accelerometer with Logging Option included

NOTE: More than one option may be applied - E.g.:

Model: ZB110(PT) Sounder Option and Temperature and Humidity Option included

Line2: MAC address

001B0A is the IEEE UID for Intelligent Distributed Controls

xxxxxxxxxx = is the remaining unique MAC address

This is also used as the serial number

Line3: FCC ID:

V7OZB110 is the identifier for all variants

Location:

Material:

Brother P-Touch: **TZS-221 Strong Adhesive Tape**

Extract from Brother Website:

P-touch Strong Adhesive Tapes:

In many fields of industry you don't always have the luxury of working with perfectly smooth, flat surfaces that provide your label with maximum adhesive contact. Often the surfaces you are labelling are textured, rough or uneven, which means that your label is only adhering to "points" of the surface. So the actual adhesive strength of labels that work well on smooth surfaces is greatly reduced, sometimes by as much as half.

To compensate for this effect, our Strong Adhesive tapes are made with a more pliable adhesive that instantly fills recessed surfaces, making more surface area contact than our standard tapes. This is the secret of how our Strong Adhesive tapes can provide up to twice the adhesive strength for those difficult to stick to surfaces.

P-touch TZ Labels Tested to the Extreme:

Extensive testing has been performed to ensure that P-touch TZ labels are incredibly durable under all kinds of conditions. They hold up extraordinarily well - and stay crisp, legible and affixed - even when subjected to abrasion, extreme temperature, industrial chemicals and sunlight.

Abrasion Resistant P-touch TZ Labels - Brother's patented tape technology ensures that Brother P-touch laminated labels can withstand even heavy abrasion.

Temperature Resistant P-touch TZ Labels - Whether you want to use our labels in freezing conditions or extremely warm environments, Brother P-touch laminated labels have been designed to last. We know this because we have tested them to the extreme. In fact, results show that our laminated labels can withstand temperatures from -80°C to 150°C.

Fade Resistant P-touch TZ Labels - Wherever you use P-touch laminated labels, they will stay as clear and legible as the day they were applied.

Water and Chemical Resistant P-touch TZ Labels - Testing TZ labels 'to the extreme' has found them to be waterproof and resistant to chemical spill
