

Modular Approval Request Letter

Dear Application Examiner,

AMICCOM, It's A7105, 2.4GHz Wireless Module, FCC ID: V8UM7105A03081009, would like to have your authorization as a limited modular approval specific to device such as RF Controller / Receiver. The requirements of section 15.212 have been met and shown on the following statements.

- 1, The modular transmitter has no RF shielding.
- 2, The modular transmitter has basic data input and output circuit and has data buffered circuit, but in fact the modulation rate is faster than data inputs rate (Modulation rate: 500kbit/s, Max. data rate: around 500kbit/s), so no conditions of excessive data rates or over modulation can occur.
- 3, The modular transmitter has its own power supply regulation. And the input voltage is between 1.9~3.6V.
- 4, The modular transmitter complies with antenna requirements of section 15.203 and 15.204(c). And it meets the FCC antenna requirements. It's an integral PCB antenna and has no antenna connector. The spurious emissions are shown in the test report.
- 5, The modular transmitter was tested both in a stand-alone configuration outside the host device and operation conditions with the representative end product. Both of this two configurations were found met all the applicable Part 15 requirements. For detailed test information please see the report for this modular.
- 6, The modular transmitter is labeled with its own FCC ID number. Please see exhibition Label Sample for the FCC ID of this module. And also in the exhibition User Manual, there are instructions for the OEM to label the end product.
- 7, The modular transmitter complies with any specific rule or operating requirements applicable to the transmitter and the manufacture will provide adequate instructions along with module to explain any such requirement.
- 8, The modular transmitter complies with any applicable RF exposure requirements. RF exposure is addressed in the test report.

Best Regards!

A handwritten signature in black ink that reads 'Ken Tsai'.
