

# User manual

**Thank you for using our products, you can get the operation method more clearly by this instruction.**

Important statements:

1. The object appearance may be different from what the manual shows, so please subject to our available products.
2. This manual is the detailed description of our products. The products improve matters would not be for further notice, we keep the right of final interpretation.

Functions :

- Navigation multimedia entertainment system, standard installation size.
- HD screen.
- Fashion and brief interface ,easy for operation.
- Built-in DVD player, auto private loader.
- Built-in smart GPS navigation system.(optional)
- Built-in BT function, support hand free bluetooth.
- Automatic screen and slip mechanism, a variety of models for choose.
- IPOD,SD,USB port, AUX IN is available.
- Built-in FM/AM radio tuner, RDS function is optional.
- Built-in 4\*45w amplifier output,4.1 track circuit output.
- For touch control.
- Built-in digital TV.(optional)
- Reversing visual function, help to monitor the backing up on video(camera need to be mixed separately)
- Convenient and practical: smart power saving,extend the battery playing time,avoid to affect driving at night.

**Attention: please read the instructions carefully before installation, and we recommend the car audio distribution to install the machine.**

This unit apply to vehicle-mounted 12V power supply system(need connect ground wire), please not use in 24V bus and lorry, it may breakdown the machine

Please use original discs,the **pirate** disc may **affect** the lifetime of the machine.

Please **do** not change the power fuses without professional.It is very dangerous to use the not suitable fuses.

Please **do** not operate the machine in driving. The driver should not watch programs and play the machine in driving. It is very dangerous!

Please ask the professional to install the machine. Disassembly the machine **unilaterally** would damage the machine or cause accident.

Do not let the machine in humid environment and water to avoid accident or damage by short circuiting.

The products use automatic precision transmission components, please not push hard the machine or knock the TFT display screens.

Please **do** not use hard thing on the screen to **avoid damaging** the screen.

**Attention :Please flameout the automobile and cut down the connection between ACC and B+ to avoid short circuit.**

## FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules.  
Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference, and
  - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Radiation Exposure Statement:**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, Human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.
