Dear Chris

Sorry for late response.
I received revised user manual today.

1. I have changed the FCC ID on the application Form 731 to FCC ID:
VA5J2W8000R in accordance with your first response. Please correct me if I am incorrect.

ANS) VA5J2W8000R is correct.

2. The FCC requires that a Confidentiality Request letter reference the FCC Rule parts pertaining to confidentiality. Please revise the Confidentiality Request letter to reference FCC Rule Parts 0.457 and 0.459 and also indicate the reason for confidentiality (such as the information being trade secrets).

ANS) I attached revised confidentiality request letter.

3. The original request for additional information indicated that this device contains digital circuitry, and thus requires additional testing and Users information. The FCC has indicated that if a device contains digital circuitry that performs functions other than enabling a transmitter that the digital circuitry is subject to FCC regulations (see the definition of Digital Device in FCC 15.3(k)). This device contains an LCD image for data received and thus contains digital circuitry. I agree that the FM receiver would not require the information from 15.105, however the digital circuitry does.

ANS) I attached revised user manual. The users information is put on page 3.

Thanks.

Best Regards,
sung-kyu Cho

Notice#2

Dear Sung-Kyu Cho,

Thank you for your first response. I have reviewed that additional information and find that there are still several items that need to be addressed before the review can be continued:

1. I have changed the FCC ID on the application Form 731 to FCC ID:
VA5J2W8000R in accordance with your first response. Please correct me if I am incorrect.

2. The FCC requires that a Confidentiality Request letter reference the FCC Rule parts pertaining to confidentiality. Please revise the Confidentiality Request letter to reference FCC Rule Parts 0.457 and 0.459 and also indicate the reason for confidentiality (such as the information being trade secrets).

3. The original request for additional information indicated that this device contains digital circuitry, and thus requires additional testing and Users information. The FCC has indicated that if a device contains digital circuitry that performs functions other than enabling a transmitter that the digital circuitry is subject to FCC regulations (see the definition of Digital Device in FCC 15.3(k)). This device contains an LCD image for data received and thus contains digital circuitry. I agree that the FM receiver would not require the information from 15.105, however the digital circuitry does.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
