

# Testing Report

Customer Name: Grandex International Corporation

Product Name: BT ANTNA

Sample Model: TC901EX ANT

Reference Standard: *GB/T 9410-2008; ANSI/IEEE Std 149-2021*

Issue Date: 2025.4.9

|                        |                |                                                                                       |
|------------------------|----------------|---------------------------------------------------------------------------------------|
| Engineer: <i>Zkmis</i> | Date: 2025.4.9 |  |
| Auditor: <i>Eason</i>  | Date: 2025.4.9 |                                                                                       |
| Approver: <i>Aaron</i> | Date: 2025.4.9 |                                                                                       |

## Version

| Version No. | Date     | Description                   | Formulate | Approval |
|-------------|----------|-------------------------------|-----------|----------|
| A0          | 2025.4.9 | For the first time, formulate | Zkris     | Eason    |
|             |          |                               |           |          |
|             |          |                               |           |          |

# 1.General Information

## 1.1 General information of testing institutions

|           |                                                                                                                                                                                               |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name      | Shenzhen RFI-LAB Communication Technology Co., Ltd.                                                                                                                                           |
| Address   | 103 Building 1 Tingwei Industrial Park, No.6, Liufang Road, Zone 67Xingdong, Xin'an Subdistrict, Bao'an District, Shenzhen, Guangdong, China                                                  |
| Tel       | 13682621346                                                                                                                                                                                   |
| E-mail    | rfi-lab_cs@tech-now.com                                                                                                                                                                       |
| Equipment | All the equipment used in the report is fixed in 103 Building 1 Tingwei Industrial Park, No.6, Liufang Road, Zone 67Xingdong, Xin'an Subdistrict, Bao'an District, Shenzhen, Guangdong, China |

## 1.2 Testing principle

### 1.3 Test equipment

| Equipment        | Model No.    | Serial No.     | Manufacturer | Calibration date | Next calibration date |
|------------------|--------------|----------------|--------------|------------------|-----------------------|
| OTA Test System  | RayZone-5000 | RFI-LAB-RF-D00 | GTS          | 2023.3.14        | 2026.3.13             |
| Network Analyzer | E5071C       | RFI-LAB-RF-D01 | KEYSIGHT     | 2024.5.6         | 2025.5.5              |
| Network Analyzer | E5071C       | RFI-LAB-RF-C02 | KEYSIGHT     | 2024.5.6         | 2025.5.5              |

### 1.4 Test environment

|             |           |
|-------------|-----------|
| Temperature | 23.6°C    |
| Humidity    | 59%RH     |
| Pressure    | 100.20kPa |

### 1.5 Statement

- (1) The test results in the report are only applicable to the tested samples and the tested samples work under the environment described in the report.
- (2) Only Shenzhen RFI-LAB Communication Technology Co., Ltd. have the right to modify the report, and the modification information shall be annotated in the revision form.
- (3) Any objection to this report shall be raised within 30 days after formal confirmation of the report.
- (4) This report is invalid if there is any evidence that the sample information provided is falsified.
- (5) The report is invalid without the signature of the auditor and approver.

## 2.Sample Information

### 2.1 Client information

|              |                                                                                    |
|--------------|------------------------------------------------------------------------------------|
| Name         | Grandex International Corporation                                                  |
| Address      | 4F., No.527, Zhongzheng Rd., Xindian Dist., New Taipei City 23148, Taiwan (R.O.C.) |
| Contacts     | Chiamin Hung                                                                       |
| Tel          | /                                                                                  |
| E-mail       | /                                                                                  |
| Manufacturer | Grandex International Corporation                                                  |

### 2.2 Description of EUT(S)

|                 |                                                  |
|-----------------|--------------------------------------------------|
| Product Name    | BT ANTNA                                         |
| Sample Model    | TC901EX ANT                                      |
| Serial No.      | /                                                |
| Antenna Type    | PCB Antenna                                      |
| Test Item       | VSWR;Antenna gain; Efficiency; Radiation pattern |
| Frequency Range | 2400-2500MHz                                     |
| Received Date   | 2025.4.8                                         |
| Test Date       | 2025.4.9                                         |
| Remark          | /                                                |

## 2.3 EUT appearance

## 3. Test Results

### 3.1 Test standard

| Name                         | Parameter            | Method                                                               | Standard no.           |
|------------------------------|----------------------|----------------------------------------------------------------------|------------------------|
| Mobile communication antenna | Antenna gain         | Generic specification for antennas used in the mobile communications | GB/T 9410-2008         |
|                              | Radiation pattern    |                                                                      |                        |
|                              | VSWR                 |                                                                      |                        |
| Antenna                      | Radiation efficiency | IEEE Standard Test Procedures for Antennas                           | ANSI/IEEE Std 149-1979 |
|                              | Gain and directivity |                                                                      |                        |

### 3.2 Test uncertainty

The uncertainty was calculated on the basis of the GUM published by ISO, using the inclusion factor of  $K=2$  and the 95% confidence level to express the extended uncertainty.

| Item                 | Uncertainty         |
|----------------------|---------------------|
| VSWR                 | $\pm 0.3$           |
| Antenna gain         | $\pm 0.72\text{dB}$ |
| Radiation efficiency | $\pm 0.72\text{dB}$ |

## 3.3 Test data

### 3.3.1 S11 parameters

### 3.3.2 S11 data

| Frequency/MHz | 2400   | 2450   | 2500   |
|---------------|--------|--------|--------|
| VSWR          | 16.210 | 14.858 | 13.682 |

### 3.3.3 Typical free space efficiency and gain

| Frequency/MHz | 2400  | 2410  | 2420  | 2430  | 2440  | 2450  | 2460  | 2470  | 2480  | 2490  | 2500  |
|---------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Peak Gain/dBi | -5.77 | -5.87 | -5.93 | -6.08 | -6.07 | -6.00 | -6.00 | -6.05 | -5.84 | -5.70 | -5.57 |
| Efficiency/%  | 9.41  | 9.63  | 9.99  | 9.66  | 9.66  | 10.09 | 9.94  | 9.74  | 9.88  | 10.01 | 10.18 |

### 3.3.4 Typical free space radiation pattern

(1) X-Z Plane(unit:dBi):

(2) Y-Z Plane(unit:dBi):

(3) X-Y Plane(unit:dBi):

(4) Typical Free Space 3D Radiation Pattern at 2500MHz(unit:dBi):

End
