EN safety handling**⚠ WARNING**

- Failure to follow these safety notices could result in fire, electric shock, other injuries, or damage to the thermometer and other property. Read all the safety notices below before using the thermometer.

- Avoid high humidity or extreme temperatures.
- Avoid long exposure to direct sunlight or strong ultraviolet light.
- Do not drop or expose the unit to intense vibration.
- Do not disassemble or try to repair the unit on your own.
- Do not expose the unit or its accessories to flammable liquids, gases, or other explosives.

| Product Name | Model Number | FCC ID | IC ID |
|--------------|---------------|----------|------------|
| Prestige | PVX500 PVX665 | XXXXXXXX | XXXXXXXXXX |

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) The device may not cause harmful interference; and 2) the device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

ISED Canada Statement

This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development.

Canada's license-exempt RSS(s). Operation is subject to the following two conditions:

- 1) This device may not cause interference; and
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure: This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment.

RF Exposure Statement:

To maintain compliance with IC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Déclaration de l'ISED Canada

Cet appareil contient des émetteurs/récepteurs exempts de licences conformer à l'innovation, la science et le développement économique.

Les RSS du Canada exemptes de licence. Leur fonctionnement suivant deux conditions:

- 1) cet appareil ne peut pas causer d'interférences; et
- 2) ce dispositif doit accepter toute interférence, y compris peut provoquer le fonctionnement indésirable de l'appareil.

Exposition aux rayonnements: Cet équipement est conforme aux radiations du Canada limites d'exposition pour un environnement incontrôlé.

Déclaration d'Exposition RF

Pour maintenir le respect des guides d'exposition RF d'IC, équipement doit être installé et actionné avec une distance minimale de 20cm le radiateur de votre corps. Cet appareil et ses antennes ne doivent pas être colocalisé ou en opération en conjonction avec toute autre antenne ou émetteur.

1.0 Welcome

The Napoleon Thermometer allows you to program your type of meat, target temperature, and cooking time using your smart device with the Napoleon Home App and monitor the internal grill temperature. When your food is cooked to perfection, the thermometer will alert you on your smart device. Included is a propane tank scale that can be used to continuously monitor your propane level. The device and the Napoleon Home App will alert you when the level is low.

A digital thermometer will also help reduce the chance of dried, overcooked meat caused by cutting for a visual examination, and help make cooked food look more presentable. You do not need to wait by the grill to monitor the cooking status. This saves you time and leaves you free to attend to your guests. Download the Napoleon Home App and enjoy smart cooking (see "Napoleon Home App" section for more details).

The Sidekick has both a Wi-Fi and a Bluetooth function. When your default Wi-Fi is not available, the Bluetooth function allows you to connect to the Thermometer with ease. See "quick start instructions" and "Napoleon Home App" sections for more information on connecting to Bluetooth.

Any use of such marks and logos as indicated are owned by the respective owners and any such use by Wolf Steel Ltd. is under license: Bluetooth® by Bluetooth SIG, Inc. Other trademarks and trade names are those of the respective owners: Android™ and Google Play™ are trademarks of Google Inc.; Apple, iPhone®, and the Apple App Store is a trademark of Apple Inc.; iOS is a trademark or registered trademark of Cisco Inc.

1.1 Features

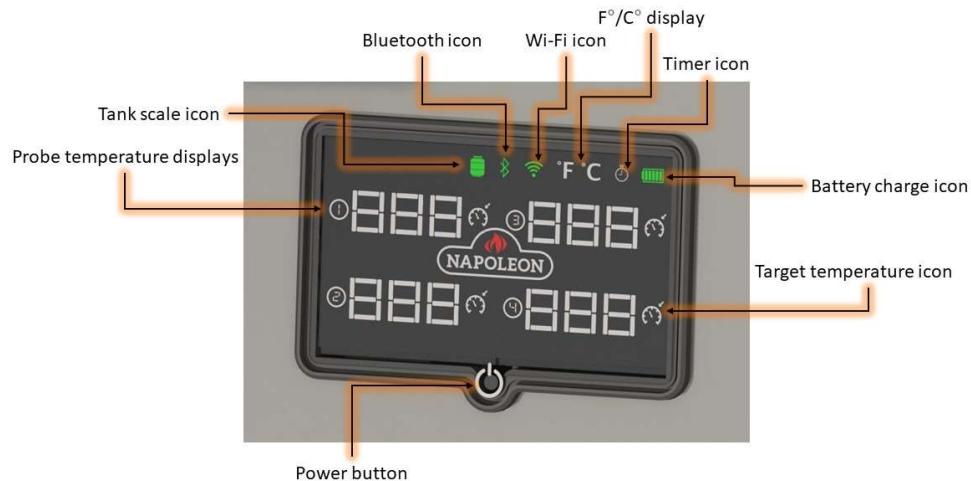

- 49.5" (125.73 cm) long water-resistant probes
- Cord wraps for tangle-free storage
- Measures food temperature from -4° F (-20° C) to 572° F (300° C).
- Temperature indication
- 5" LCD display
- Custom temperature settings
- Temperature readouts with or without IoT connectivity
- Wi-Fi functionality
- Bluetooth and Wi-Fi switching (i.e., connectivity switching)
- Powered by 6 D Cell battery or optionally by 5V 1A USB power source USB Type C
- LED Knob Lighting
- Propane Tank Scale (if applicable)

1.2 compatible devices

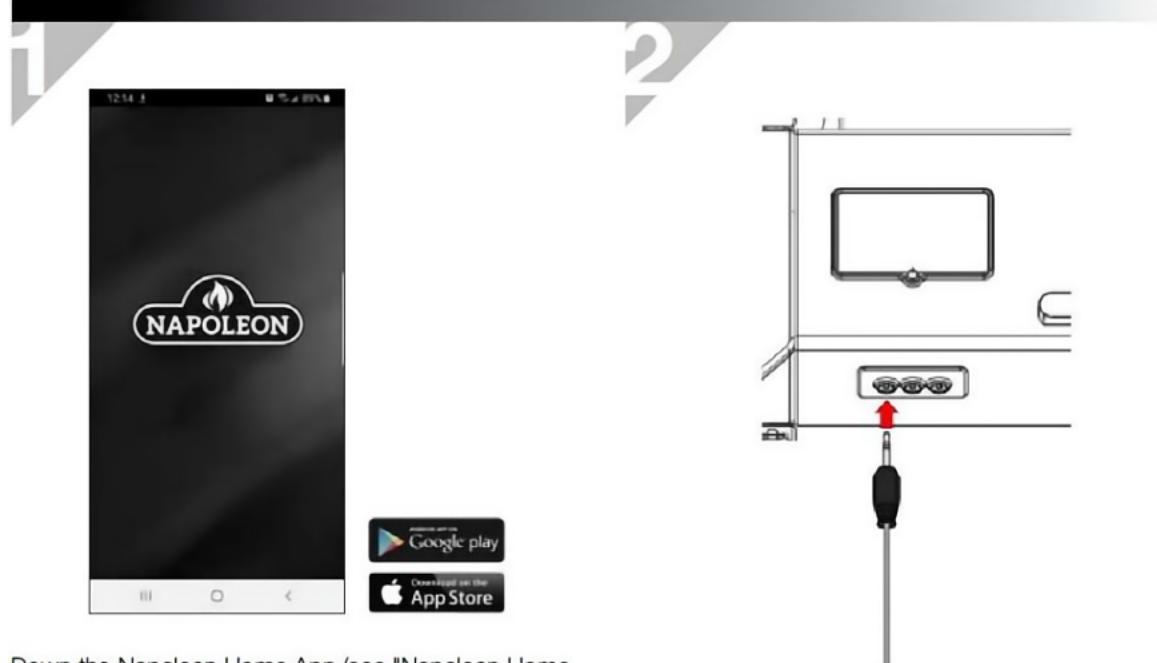

The Napoleon Home App is designed to work with a wide range of Android and iOS devices, such as iPhone, iPad mini, and iPod.

Device compatibility may not be guaranteed due to numerous different models and manufacturing standards.

1.3 screen overview

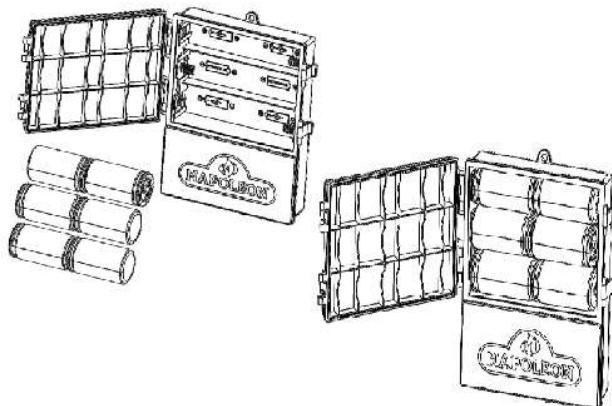

2.0 Quick Start Instructions

Download the Napoleon Home App (see "Napoleon Home App" section for more details) and make sure WiFi and Bluetooth are enabled in your smart device's settings.

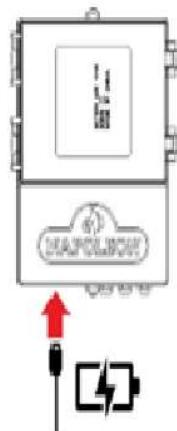

NOTE: The Thermometer can be used without the Napoleon Home App but only for the purposes of monitoring.

Remove the protective plastic and cling and plug one or more probes into your Thermometer to power the unit on.

3

The device can be powered by 6 D-cell batteries. Please follow these steps to install them:

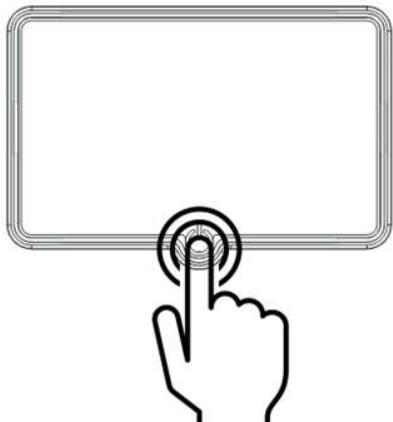

1. Unclip the latch to open the box.
2. Insert the batteries as indicated in the battery compartment.
3. Close the box and secure it by clipping the latch.

4

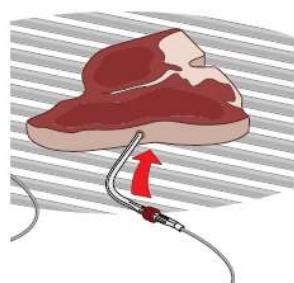

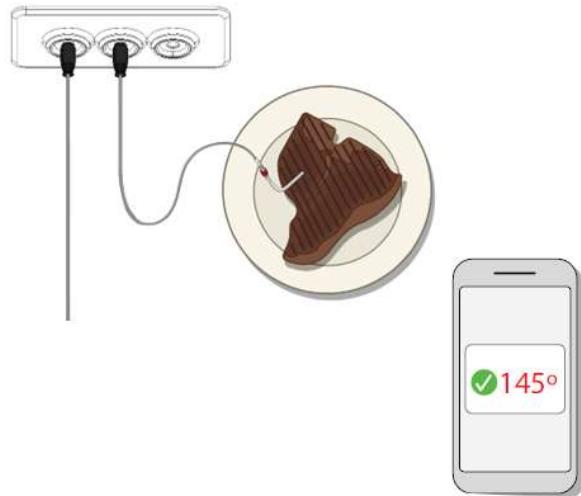

Alternatively, the device can be powered using a direct supply through the USB Type C port. To do this, use a 5V 1A adapter. It is recommended to remove the batteries if using direct supply to prevent corrosion and prolong battery life.

5

Open the Napoleon Home App on your smart device and make sure the Thermometer is in range.

6

To finalize initial pairing with your smart device, press down on your Thermometer for 5 seconds until it restarts.

7**8**

When using meat probes, ensure that the tip of the probe is inserted into the thickest section of the food, avoiding bones or fat.

Follow the step-by-step grilling instructions in the Napoleon Home App. Enjoy your meal!

3.0 Napoleon Home App

HOW DOES IT WORK?

Access your appliance remotely by downloading the **Napoleon Home App** from your app store.

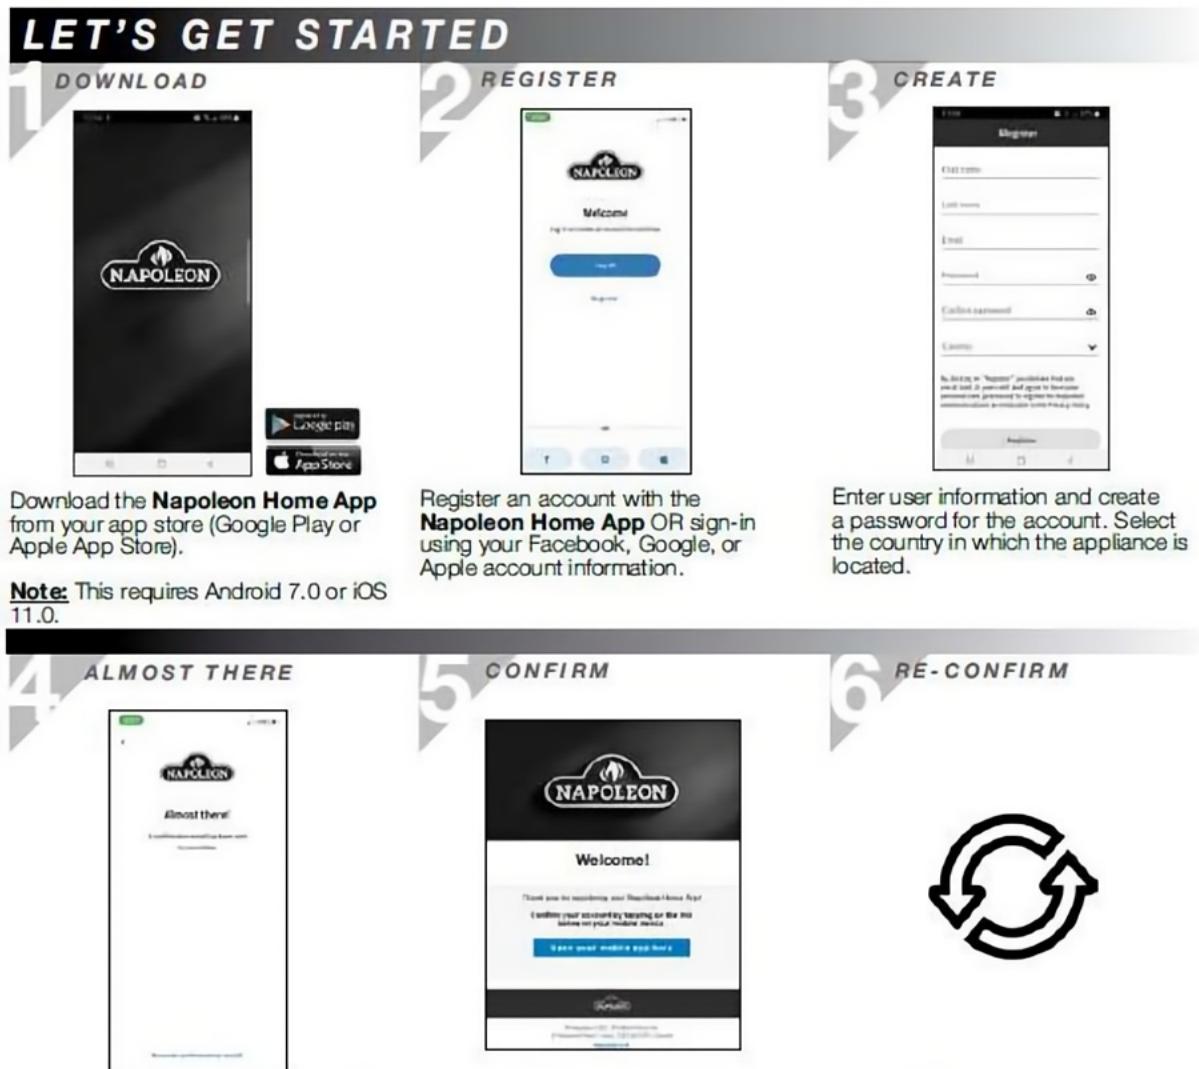

In order to access the app, you will be required to create an account by following the instructions listed within the app (see below for details).

By pairing your appliance to the **Napoleon Home App** via Wifi or Bluetooth, you can control to all modes and functions of the appliance.

All notifications and alarms are sent through the app to keep you connected with ease.

Scan this QR code for direct access to the Napoleon Home App website.

Download the **Napoleon Home App** from your app store (Google Play or Apple App Store).

Note: This requires Android 7.0 or iOS 11.0.

Register an account with the **Napoleon Home App** OR sign-in using your Facebook, Google, or Apple account information.

Enter user information and create a password for the account. Select the country in which the appliance is located.

The information entered in Step 3 will be registered to the **Napoleon Home App** and a confirmation will be sent to the email provided.

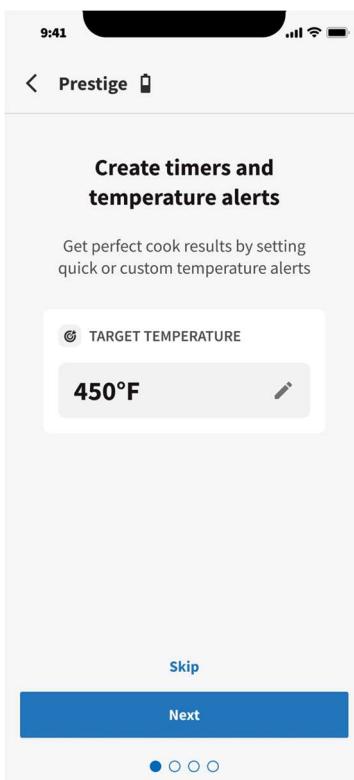

Open email inbox and select the confirmation link.

Note: The confirmation link must be opened on the device that the **Napoleon Home App** is installed on.

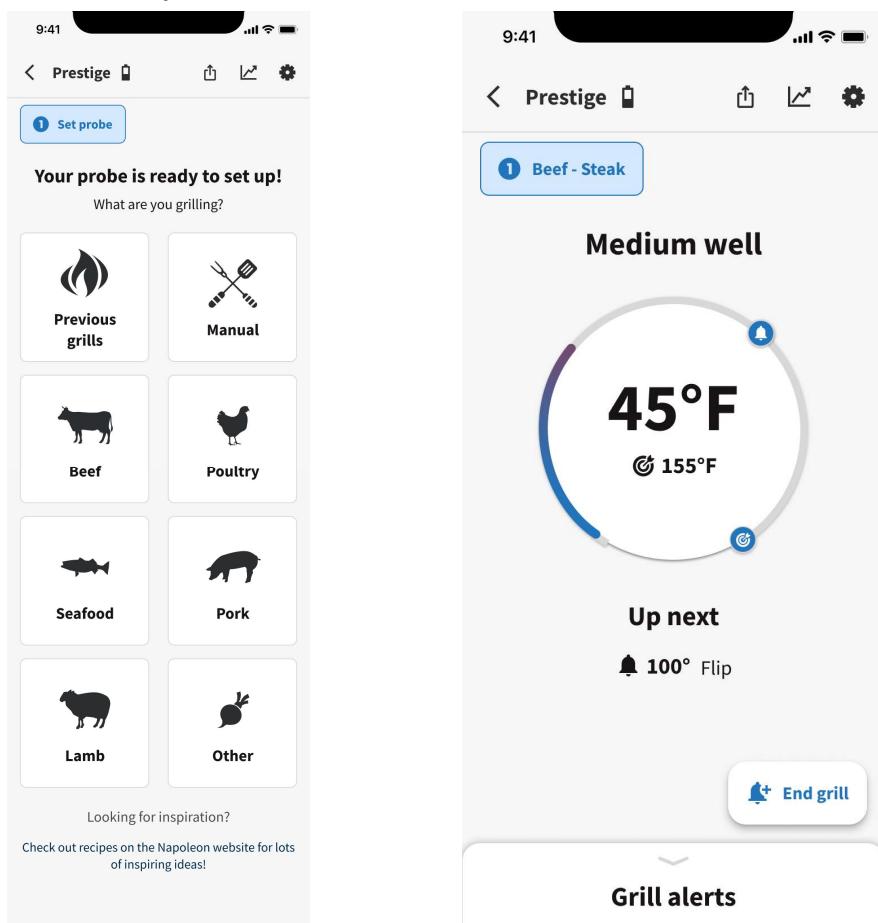

If no email is found, click "Re-Send Confirmation Link" and check junk folder.

4.0 App Overview

4.1 First Download Use

4.2 Set Probe (guided cook)

4.3 Set Probe (manual)

The screenshots show the manual probe setup process in the Napoleon app:

- Step 1:** The app starts with a "Set probe" button. It asks "What are you grilling?" and lists categories: Previous grills, Manual, Beef, Poultry, Seafood, Pork, Lamb, and Other.
- Step 2:** The "Set probe manually" screen. It has tabs for "Target temperature" and "Temperature range". The "Target temperature" section shows a dial set to 375°F (Medium high). The "Temperature range" section shows a dial set from 100°F (Temp min) to 145°F (Temp max).
- Step 3:** The "Set probe manually" screen again, showing the target temperature dial set to 375°F and the temperature range dial set from 100°F to 145°F.
- Step 4:** The "Beef - Steak" screen. It shows a circular gauge with 45°F highlighted. It also shows a "Medium well" label, a "375°F" label, and a "100° Flip" notification.

4.4 Set Probe (previous grill)

The screenshots show the previous grill setup process in the Napoleon app:

- Step 1:** The app starts with a "Set probe" button. It asks "What are you grilling?" and lists categories: Previous grills, Manual, Beef, Poultry, Seafood, Pork, Lamb, and Other.
- Step 2:** The "Previous grills" screen. It shows a section for "My saved grills" with images of "First Spring Steak" and "Cheesy stuffed baked potatoes". It also shows a "Recent" section with a note: "You haven't completed any grills yet. Once you complete a grill session it will appear here."

4.5 Add Temperature & Timer Alert

The screenshots show a flow from a main grill status screen to an alert configuration screen, then to a detailed alert setup, and finally to a summary of saved alerts.

Screen 1: Main Grill Status

- Shows two grills: one at 55°F (target 155°F) and one at 56°F (target 145°F).
- Buttons: "SET UP PROBE" (x2), "MY GRILLS", "Add salt".
- Bottom: "Save grill" button.

Screen 2: Add grill alert

- Alert type:** Temperature alert (selected).
- Fields:**
 - Temperature alert name: "Enter alert name" (0/40).
 - Temperature: "Enter temperature".
 - Probe: "Select probe".
- Bottom: "Add alert" button.

Screen 3: Add grill alert

- Alert type:** Timer (selected).
- Fields:**
 - Timer name: "Enter timer name" (0/40).
 - Duration: "00 hours 00 min" (01 01).
 - Probe: "Select probe".
- Bottom: "Add alert" button.

Screen 4: Grill alerts

- Target Temperature:** 155°F.
- Temperature Alerts:** 145°F (Flip).
- Timer Alerts:** 15:58 Timer 1.
- Buttons: "Save grill" (blue), "Add alert".

4.6 Save Grill

The screenshots show a flow from a grill status screen to a save configuration screen.

Screen 1: Grill Status

- Grill name: "Beef - Steak".
- Temperature: 45°F (target 375°F).
- Up next: "100° Flip".
- Bottom: "End grill" button.

Screen 2: Save grill

- Text:** "Save the settings from your current grill so you can follow the same steps another time."
- Fields:**
 - Grill name: "Enter grill name" (0/40).
 - Add photo button.
- Image:** A photo of a grilled steak.
- Bottom: "Save grill" button.

5.0 Alerts

5.1 Safety Glow

Illuminate the control knobs by pushing the light bulb icon on the control panel. When a burner is operating, the corresponding knob will glow red, while the rest will remain blue. In order to conserve battery life the knobs glowing blue would turn off after 1 hour by default when running on batteries, while the rest will remain red. The shutoff time of 1 hour for batteries can be adjusted within the app. When using a USB power source the shutoff timer for the lights will be ignored.

5.2 Low Battery

When the system is powered from a battery source the knobs will flash indicating the battery is running low. In addition, you can monitor the battery level status through the mobile app and on the display. Real-time notifications through mobile app will alert you if the battery level is low. Battery status is also indicated on the screen as shown below.

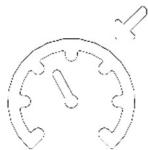

Green – Full

Orange – 50%

Red – Low

5.3 Temperature Alerts

The system can provide audible alerts when target temperatures have been reached. They can be setup from the app covered in section 4. The screen will indicate which probes have a target temperature set as shown below.

5.4 Timer Alerts

The system can provide audible alerts when the timer has ended. They can be setup from the app covered in section 4. The screen will indicate when a timer has been set as shown below.

5.5 Propane Tank Scale (if applicable)

The system can continuously monitor the propane remaining in the tank and provide the information at a quick glance to the user. To set up the tank scale for accurate readings refer to section 6.

Green – 100%

Orange – 70%

Red – 30%

Flashing Red – Low

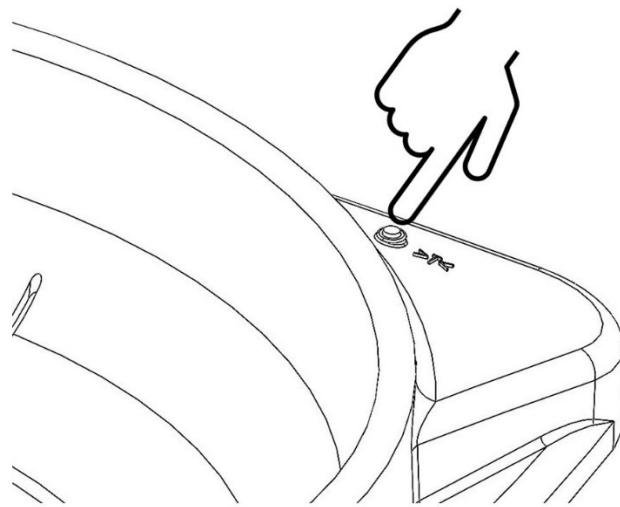

6.0 Propane Tank Scale Setup (if applicable)

6.1 Taring the scale

Before calibrating, ensure to follow the zero tare instructions:

- Remove the empty tank from the scale.
- Press the designated button to initiate zero tare.

- Wait for 20 seconds for the taring process.
- Place the new tank on the scale after zero tare completion.

6.2 Selecting the tank

Opening the Napoleon Home App and Accessing Tank Scale:

- Launch the Napoleon Home App.
- Navigate to the tank scale section.

The screenshots show the 'Tank scale measurement' screen of the Napoleon Home App. The left screenshot shows a dropdown menu for 'Region' with 'North America' selected. The right screenshot shows fields for 'Empty tank weight' and 'Full weight' with placeholder text 'Enter empty tank weight' and 'Enter full tank weight' respectively.

Selecting Tank and Region:

- Click on "New Tank Scale."

- Toggle between your preferred unit (lbs/kg)
- Choose the region (North America, EU or Custom).
- For the US, default tank weights are selected.
- For the EU, select from the list of available tanks specifications.

Custom Tank (Optional):

- If you choose custom tank, input the empty tank weight and its full weight. This ensures precise measurements.
- Empty Tank Weight (lbs/kg): Enter the weight of the empty tank in pounds or kilograms.
- Full Tank Weight (lbs/kg): Enter the weight of the full tank in pounds or kilograms.
- Ensure accurate values before proceeding with placing tank in the holder.

6.3 Placing the tank

- After the above section are completed the tank can be placed in the holder. It may take up to 1 minute to view the data in the app.

7.0 Cleaning and Maintenance

⚠ CAUTION

- Keep the stainless steel probe sensors and cords away from children. Use care when handling the probes. Always wear a heat resistant glove to touch the stainless steel probe sensors or cords during and right after cooking. Do not use probe cables or rings to move probes.
- Do not use the probes in microwave ovens or on a rotisserie.

- Clean the probes before using for the first time.
- Hand wash the metal portion of probes and dry thoroughly after each use. **Do not wash in a dishwasher.**

NOTE: The probe jacks, probe cables, and display unit are water resistant but should not be left in the rain. The appliance should never be immersed in water.

- Probes are rust-proof and corrosion resistant. Do not use any chemicals or cleaning solutions to clean the probes except mild soap.
- Use the cord wraps for tangle-free cord storage and to prevent kinks and folds.
- Store Sidekick Thermometer at ambient temperatures ranging from 32° F (0° C) to 95° F (35° C).

7.1 Safeguards

- Probes can operate from -4° F (-20°C) to 572° F (300°C).
- Probe cords can operate within -4° F (-20°C) to 716°F (380°C).
- **IMPORTANT:** Do not allow the probes to be directly exposed to flames or temperatures exceeding 572° F (300°C).
- For accurate readings, insert the probes into the center of meat, ideally before it is placed on the grill.
- **IMPORTANT:** Hold the tips of the probes downward but do not allow the tips to touch the grill grates. Ensure that probes do not touch the grill.
- Place meat on the side of the grill closest to the thermometer.
- Position the cord at a high exit point so the cord stays sufficiently above the grill when the lid is closed.

7.2 Check clearance prior to cooking

Check that the cooking area does not exceed the maximum temperature and cords are not kinked or frayed by closed doors or lids.

First check the cord clearance at ambient temperature with the cooking unit closed; examine the cord for any severe kinking or bending.

Then turn the temperature unit on and use the probe to examine hot spots where the cord may make any surface contact.

8.0 Troubleshooting

This is a list of common troubleshooting steps to help correct typical situations that might occur when pairing the app with the thermometer unit.

On the thermometer unit, always ensure that the Bluetooth and Wi-Fi logo icon is flashing, indicating it is ready to pair with a Smart device.

| App Problem | Possible Causes/Solutions |
|--|--|
| The app is not installed or is not properly installed. | <ul style="list-style-type: none">• Check internet connection.• Connect to Internet via Wi-Fi and download the app from the App Store or Google Play.• Follow prompts to automatically install and open the app.• Check the app icon on home screen.• Uninstall and reinstall app if needed (see "Napoleon Home App" for more details).• Allow the app full access to files and your location. |
| The app is installed but shows a screen with a "probe is not connected" text. | <ul style="list-style-type: none">• Ensure probes are properly inserted into the slots on your Thermometer device.• Maximize Thermometer receptivity by facing the LCD display on the thermometer with the Smart device in close range.• Completely close the app and restart it (be familiar with your device's basic operations and settings).• Close out any unnecessary programs on the Smart device that may be consuming memory. |
| The app worked before, but the device name is not listed in the app device list. | <ul style="list-style-type: none">• App is not searching or not able to find the device.• Click "Try Again" on the "no devices found" page or hit the back button on the "devices found" page to restart scan.• Turn the thermometer off and on by holding the power button for 5 seconds. Ensure Bluetooth is activated in the mobile Smart device settings.• Bring the Smart device close to the thermometer unit.• Refresh the memory cache by closing and reopening the app.• Ensure your device's location setting is turned on.• Wait between 30 and 60 seconds between steps. |
| The thermometer lost the connection while in operation and shows a "connection lost" page. | <ul style="list-style-type: none">• Try to locate cause of frequency interference or physical obstruction.• Bring Smart device back within range of the thermometer (50 m / 160') or line of sight.• Toggle the thermometer unit off and on.• Force close and reopen the app as a last resort. |

| | |
|-----------------------------|--|
| The alarms are not working. | <ul style="list-style-type: none"> • Check the device connection. • Check appropriate sounds or notifications are turned on in your Smart device settings. • Check that alarm (or vibrate) notification is selected in the Napoleon Home App. |
|-----------------------------|--|

9.0 Warranty

Napoleon President's 1 Year Limited Warranty

Napoleon warrants that components in your new Napoleon product will be free from defects in material and workmanship from the date of purchase, for a period of 1 year from date of purchase.

If this product fails to meet your expectations for any reason, please email our customer solutions department or visit our website for more information.

NORTH AMERICA:

Conditions and Limitations

Napoleon warrants its products against manufacturing defects to the original purchaser only, provided that the purchase was made through an authorized Napoleon dealer and is subject to the following conditions and limitations:

This factory warranty is non-transferable and may not be extended what-so-ever by any of our representatives.

This limited warranty does not cover damages caused by misuse, lack of maintenance, grease fires, extreme environments, accident, alterations, abuse or neglect. Discoloration to plastic parts from chemical cleaners or UV exposure is not covered by this warranty.

This limited warranty further does not cover any damage determined to be caused by heat or water.

Napoleon will not be responsible for: environmental conditions such as interference caused by other operating devices.

The bill of sale or copy will be required together with a serial number and a model number when making any warranty claims from Napoleon.

Napoleon reserves the right to have its representative inspect any product or part prior to honoring any warranty claim.

Napoleon shall not be liable for any transportation charges, labor costs, or export duties.
