

## **RF Exposure Statement**

### **1. Standard Applicable**

According to 1.1307 (b)(1), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a portable device.

### **2. Measurement Result:**

This is a portable device and the max average output power is -3.03 dBm (0.4977mW).

The antenna gain of the device is 0dBi

The EIRP of the device is  $-3.03+0 = -3.03\text{dBm} = 0.4977\text{mW}$

Lower than the low threshold  $60/\text{f GHz} = (24.37\text{ mW}),$

The SAR/MPE measurement is not necessary.
