2 Get Started

2.1 Touch Pen

You need to use your touch pen operating the procedures on the touch screen to input the information with conventional keypad. Touch the screen can choose or implement a file of command, as in the use of the computer mouse to click on the same.

Touch pen stored in the phone behind, when you do not need to use it, can be inserted back to its jack.

2.2 Install/Remove Battery

Your phone uses Lithium battery only. Use original battery or authorized one and keep it in good place.

Install or remove the back cover. Do as the illustration showed below to install the back cover according to the upward arrow. Do as the illustration showed below to remove the back cover according to the downward arrow.

Install Battery: Place the battery on the backside of the phone. Clip the top of the battery and push it down to lock into place. Take out battery: face the backside of the phone, take out the battery just by lifting it up as the illustration showed below.

Notices:

Long press the End Key to power off, wait for 10 seconds, then remove the battery to avoid damaging the storage.

2.3 Charging

Use only original charger or authorized one for this GSM Double-card phone. Insert the plug (with arrow on it) of your charger to the charging port at the base of your phone.

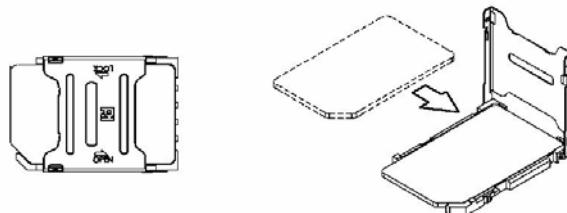

When you begin to charge the battery, the stripe of Signal Strength on the right corner of the screen starts to roll. The battery is fully charged when the stripe becomes full and stops rolling. Push the buttons on both sides of the charger to take out the plug.

Notices:

- (1) Do not charging the mobile phone without battery, in order to avoid damaging the phone or adapter;
- (2) Do not be forcibly inserted into joints to avoid damage the phone or adapter;
- (3) Please use the battery after it is used up completely and then charged full for the first three times, your battery will be in the best status;
- (4) The battery will be automatically discharge, please charging it when its not used for a long time;
- (5) Do not use any damage or failure of battery and adapter;
- (6) After charged and discharged for hundred times, it will be disabled. If the working time is shorter, please replace it.

2.4 SIM Card

Find the slot place, open the button, and then put the card into it and buckled to fix the card. Make sure that the gold-colored contacts on the card face down into the phone, and notice the angles cutting.

⚠ Notices:

- (1) Must close the phone, charger and then continued to remove the SIM card.
- (2) Please do not touch the metal area to avoid losing and breaking the information in the SIM card. Put the SIM card far from electricity and magnetism.
- (3) SIM card must be in the place with the temperature -20°C to 85°C.
- (4) Please put the SIM card out of the reach of the children.

2.5 T-FLASH Card

T-FLASH card, the formal name of TransFlash card, is an extended memory card that stores multimedia files.

Insert: ①open the T-FLASH plastic plug;

②insert the card horizontally with the metal contacts facing upward and hear a click.

Take out: ①open the T-FLASH plastic plug;

②press the card gently and it will be released after you hear a click.

⚠ Notices:

- (1) The card is damaged easily, please do not bend and injury it, and put it far from electricity, dust and water.
- (2) Hot swap the T-FLASH card in the idle, avoid swap it during using, that will lead to loss the files or ruin.
- (3) T-FLASH card has many brands currently on the market, compatibility varies greatly. Suggest using the card in the package or buy the regularity brands as KingMAX, Kingston, SanDisk.

In the list interface, click Menu or press OK key to select Storage. You can view the capacity of Phone, UIM and SIM card.

7 Troubleshooting

If you meet the following situation when using the phone, please read the information as follows, please contact the seller if still cannot resolve the problem.

1. Cannot dial/answer a number, or cannot send/receive a message to anybody.

Please check the call firewall and message firewall.

2. If you find some files lost in Phone.

Please check the total, ensure the total is less than 300.

3. If you can not find some one of MP3, 3GP, JPG or KARAOK folder in the root directory of the TF card.

Please check from these parts as follows:

(1) MP3 folder only stores the file format of mp3 and mid; 3GP folder only stores the file format of 3gp and mp5; JPG folder only stores the jpg format; KARAOK folder only stores the kov format;

(2) Please check the total under the root, ensure it is less than 300;

(3) Please ensure the length of the files is less than 28.

4. If you cannot identify some folder except for MP3, 3GP, JPG and KARAOK.

To make sure that your phone works well, the phone is designed to identify only four folders as MP3, 3GP, JPG and KARAOK. Please divide them into the four folders according to “3(1)”.

5. Inserted a TF card, but it shows a prompt to insert the TF card.

Please check the TF card, maybe damaged or inserted error.

6. If you find some one cannot be played.

(1) Please check the file, maybe damaged, or not a correct format.

(2) This phone supports a part of mid and mp3 files;

(3) If the 3gp files will not be supported, please use the DJ star (Saturn version) to convert tools, see the CD-ROM.

8 Important Safety Precautions

General

- Use your phone in the intended manner; for example, hold it to your ear. Incorrect usage may affect its performance.
- Use only compatible batteries and accessories. Using incompatible items may permanently damage the phone.
- Do not connect the phone to any other device without reading the provided documentation. The other device may be incompatible.
- When making emergency calls from your phone, ensure that the phone is switched on and in service.
- Interference may affect your phone's performance. Once you move away from the source of interference, the phone should function as usual.
- When you are using ear buds or other headphones, be careful not to listen at excessive volume. Listening to very loud sound levels may lead to hearing loss. Also, listening through the ear buds or headphones for prolonged periods of time, even at normal sound levels, may lead to hearing loss. You should consult your doctor for more information on proper use of ear buds or headphones.

Electronic Devices

- Near the electronic devices which control by the high precision, please power off the phone. Otherwise it may lead to malfunction.
- Your phone may interfere with hearing aids, pacemaker, medical devices, and electronic systems. Please contact with the service provider or doctor. Consult a physician or the device manufacturer to ensure safe practice.

Children Health

Keep the phone and all the parts and accessories (for example, UIM card, SIM card, TF card) out of the reach of small children.

Operating Environment

- Does not use the phone hand-held while driving or otherwise operating machinery? If using the phone hand-held, park the vehicle before conversing. If using an integrated hands-free device, make sure the phone is securely in its holder.
- Switch your phone off when entering a hospital or other such institutions. Medical equipment may be effected by the phone so you should observe any building regulation governing phone usage.
- Switch your phone off when on an aircraft. The aircraft's systems may be affected by the phone signal. You are legally obliged to comply with this recommendation.
- Switch your phone off in any facility where posted notices so require.
- Do not use your phone when refueling. You should keep your phone away from fuel and chemicals.

- Switch your phone off when blasting is in progress. Observe any provided guidelines or regulations.
- Switch your phone off when in an area of a potentially explosive atmosphere (for example fuel storage areas, spray paint facilities etc.).
- Only qualified personnel should install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty. For more information, check with the manufacturer, or its representative for your vehicle.

Care and Maintenance

- Keep the phone dry as moisture of any kind can contain minerals that will corrode the electronic circuits.
- Do not use or store the phone in dusty or dirty locations as the movable parts of the electronic circuits.
- Do not use or store the phone in excessively hot places. High temperatures will shorten the life-span of the phone, damage the battery or warp/welt the plastic used in the phone's manufacture.
- Do not store the phone in excessively cold places. When there is a difference in temperature between the room and the phone, condensation can form inside the phone, causing damage to the electronic circuits.
- Do not open the phone unless absolutely necessary, for example, to install the battery or SIM card. We recommend that you go to your dealer when problems arise with either of these items and allow their experts to handle the phone instead.
- Do not mishandle or abuse the phone. Dropping, knocking or shaking it can damage the internal circuits.
- Do not use harsh chemicals, strong detergents, or cleaning solvents to clean the phone. If you must clean it, then use a soft, clean and dry lint-free cloth.
- Do not apply paint or other such substances to the phone. This could clog the phone's movable parts.
- If the phone or any of the accessories are not working as they should, please consult your dealer who can provide you with the expert assistance required.
- Electrical interference may affect your phone's performance. This is perfectly normal and once you move away from the source of interference, the phone should function as usual.
- Do not attempt to disassemble your product, including accessories. Only the manufacturer authorized personnel should perform the service.

Environment Protect

Do not dispose of the battery in an ordinary bin. The battery contains toxic chemicals and must be disposed of in the correct manner. Contact your local authority for more information.

SOS

The SOS enables you to call the emergency services without the service. Because the network could not guarantee connectivity under all circumstances, so that in case of

emergency, not as the sole contact to the phone.

Battery and Charger Safety

- A new battery or one that has not been used for a long time could have reduced capacity the first few times it is used.
- Only use batteries approved by the phone manufacturer.
- When the charger is not in use disconnecting it from the power source.
- Do not leave the battery connected to the charger and power source for longer than necessary as overcharging it will shorten its life.
- Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object causes a direct connection between the + and – terminals of the battery.
- Do not expose the battery to extreme temperatures, for example, a fridge or a car exposed to direct sunlight, as this will affect its performance.
- Do not dispose of the battery in a fire.

Health and safety information

SAR certification information

THIS MODEL MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. The guidelines were developed by independent scientific organisation ICNIRP and include margins designed to assure the protection of all persons, regardless of age and health.

This guideline uses a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 1.6 W/kg and the highest SAR value for this device when tested at the ear was 0.586W/kg.¹

1. The tests are carried out in accordance with international guidelines for testing. As SAR is measured utilising the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines
