Carpi, 27th of February 2018

FCC ID: VFZKLGZADI03

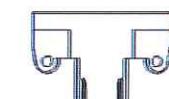

Product Name: E-Lock

Differences between models EL0340, EL0343 and EL0349

The E-Lock system is available in different mechanical variants. The difference among the variants is the exit direction of the wiring from the electronic unit, its plastic enclosure, the length of the bolt and the firmware version. The system functionality and the radio characteristics are a common part of the firmware as the transponder is the same; what can change among the variants of the system is the customizability of some accessory features.

Model	Description	Pictures
EL0340	E-lock with lateral exit direction of the wiring.	
EL0343	E-lock with bottom side exit direction of wiring and the external plastic enclosure customized.	

EL0349	E-lock with bottom side exit direction of wiring.	 
--------	---	--

All other components and parts (LF antenna, pcb, components, pinout and connectors) are the same.
