RE: ATCB005453

FCC ID: VH7-JW02R

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. Please provide a block diagram showing the frequencies of the crystals, VCOs, clocks and other frequency generating circuitry.
2. The peak ratio shown on page 16 is -24.656 dB, but the maximum value can be used is 20dB according to **"FCC 15.35(b) the limit on peak radio frequency emissions is 20 dB above the maximum permitted average emission limit applicable to the equipment under test."**
Please correct the average values shown on page 17,18 and 19 of your test report.
3. The product name shown on the test report is "2.4GHz WIRELESS RECEIVER", which is not allowed due to this device with transmitter function.
Please correct it with acceptable product name such as "2.4GHz WIRELESS DEVICE" or "2.4GHz WIRELESS TRANSCEIVER".

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
