| Test Setup | Power Line Conducted Emission (Front)                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|            |  A photograph showing the front view of a test setup inside an anechoic chamber. A large, white, rectangular test fixture is positioned in the center. The chamber walls are covered with dark, reflective electromagnetic absorbing material. To the right, a computer monitor and other electronic equipment are visible on a desk. The floor is also covered with absorbing material. |
| Test Setup | Power Line Conducted Emission (Near)                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|            |  A photograph showing a close-up, near view of the test setup inside the anechoic chamber. The white test fixture is on the right, and a long, thin, metallic rod or cable extends from the left towards it. The floor is covered with dark, reflective electromagnetic absorbing material. A power strip and other equipment are visible on the floor.                                 |
