Subject: 15.407(b)(4)(ii)

To whom it may concern

Regarding VK6-ODU600HB, we attest that we are applying under 15.407(b)(4)(ii) and that this device meets the requirements of §15.247(d). The emission limits comply with § 15.247(d) for all antenna configurations. We acknowledge that for the antennas approved for use in the application, Aviat cannot market, sell or import them after 2nd March 2018.

Additional testing was performed for usage of the radio with an alternative modem. This allows 30MHz channel spacing only with just two bit rates within this channel spacing (135Mbps and 155Mbps). Testing was also performed for usage with another indoor unit (CTR 8540). This allows use of the radio at QPSK, 16QAM, 32QAM, 64QAM, 128QAM, 256QAM, 512QAM and 1024QAM at 5MHz, 10MHz, 20MHz and 30MHz

Yours faithfully,

Ruth French

Product Compliance Manager
