Re: IC: 6384A-4052TPSE

Dear Examiner:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

The accompanying Application and Agreement Form for Industry Canada Certification Services and FCC per rule 0.457 and 0.459 CFR is being filed with the commission on our behalf by Elliott Laboratories, Inc., a consulting and testing laboratory. Included, as exhibits with the enclosed application are block diagrams, schematics, and a detailed description of the theory of operation of the device.

It is our intention to provide Elliott TCB and Industry Canada with a full disclosure of our product so that its merits can be evaluated. Indeed, we are pleased to provide any further information that Industry Canada might wish to see. It is not our intention, however, to make our proprietary process a matter of public record.

In view of the fact that the block diagrams, schematics, and associated theory of operation disclose the mechanism of our process, we ask that these portions (block diagrams, schematics, and theory of operation) of our application be withheld from public inspection. These documents contain details of the proprietary operation of the product. These details are not readily discernible - even to technically sophisticated individuals - from our hardware and constitute trade secrets.

We request therefore that these documents and this letter be segregated from the body of our evaluation report and withheld from public inspection.

Thank you for your attention. Please let the undersigned know if Elliott TCB or Industry Canada disagrees with our position or requires further justification.

Sincerely,

Jeff Altheide
Quality Assurance Manager
