RE: Confidentiality Request for **Models 70-5000-03 and 70-5000-04, FCC ID VLNWAY5000-1**

Dear Examiner:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. The accompanying Form 731 is being filed with the commission on our behalf by Met Laboratories, Inc., a consulting and testing laboratory. Included as exhibits with the enclosed application are block diagrams, schematics, and a detailed description of the theory of operation of the device.

It is our intention to provide the commission with a full disclosure of our product so that its merits can be evaluated. Indeed, we are pleased to provide any further information that the commission might wish to see. It is not our intention, however, to make our proprietary process a matter of public record.

In view of the fact that the block diagrams, schematics, parts list, tune up procedure, and associated theory of operation disclose the mechanism of our process, we ask that these portions (block diagrams, schematics, parts list, tune up procedure, and theory of operation) of our application be withheld from public inspection as provided under FCC section 0.459. These documents contain details of the proprietary operation of product. These details are not readily discernible - even to technically sophisticated individuals - from our hardware and constitute trade secrets.

We request therefore that these documents be segregated from the body of our evaluation report and withheld from public inspection.

Thank you for your attention. Please let the undersigned know if the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in blue ink that reads "Dale Robertson".

Dale Robertson
Principal Hardware Engineer
