4. The optical mouse will not work well on a smooth surface glass, reflecting surface, 3D mouse pad and etc.
5. No need to press the code button if the battery changing time is within 10 seconds. Otherwise, you need to press the button again.

Caution

Any changes or modifications are not expressly approved by the party, which is responsible for compliance that could void the user's authority to operate the equipment.

Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Improper operation of the equipment can cause harmful interference to radio communications. However, there is no guarantee that interference will not occur when this equipment is being used. If this equipment causes harmful interference to radio or television reception, you can turn off this equipment first and try the following measures:

--Relocate the receiver

--Increase the distance between the equipment and receiver within the effective range.

--Consult the dealer or an experienced radio/TV technician for help.

Note:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
Caution:
The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
