MAIN BOARD TOP VIEW (WITHOUT SHIELDING)

MAIN BOARD REAR VIEW

A photograph of a custom green PCB assembly. The board features a central monochrome LCD screen. Above the screen is a ribbon cable with 20 pins. There are several push buttons: two on the left side, one in the center above the screen, and two on the right side. Various electronic components like resistors and capacitors are visible on the board. A ruler is placed below the board for scale, showing dimensions in millimeters and centimeters.
