Columbia, Maryland 21046

To whom it may concern,

On behalf of Bayer Diabetes Care, I respectfully request original certification for the Bayer CGMM01 Monitor under part 15.249 rules. The device will be identified with FCC ID VN5-CGMM01.

The CGMM01 is part of a Continuous Glucose Monitoring System which allows individuals to track changes in tissue glucose levels as part of a Diabetes management regimen. A companion device, the CGMT01 transmitter, attaches to a body-worn minimally invasive glucose sensor, providing wireless data transmission to the CGMM01, a handheld monitor which displays current glucose data, graphs recent data and stores historical data for future review and reference. The CGMM01 Monitor employs RF transmissions to the CGM01 Transmitter for various control functions.

Sincerely,

A handwritten signature in black ink, appearing to read 'RAB', with a stylized flourish extending to the right.
