

FCC ID: VNOBT900

Circuit Description

Modulations provided by IC and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

No external antenna

There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 117 Volt

Operation Descriptions

The EUT is a voice transceiver operating at 2400-2483.5MHz band. The transceiver is powered by a 117V battery and the transmitting frequency is IC. The operation is achieved by different combinations of form pulse modulating signal on the 2400-2483.5MHz carrier frequency.

Remarks:

The EUT continues to transmit / receive while switch on. It is button transmitter, Modulation by IC; and type is Pulse modulation.
