

Applicant: Great American Duck Races, Inc.

FCC ID: VNY-4301

## **Operation Description**

The EUT carries on processing through the temperature sensor gathering ambient temperature data transportation for the screen, and through the launch module to launches the temperature data to the receiver. Through voltage sample, when the voltage is lower than 2.6V, screen display low voltage mark.

Antenna is formed by a spiral copper. Common grounding on PCB is not connected to real external ground. Power supply is DC 3V by tow "AAA" batteries.
