

This product is a remote controller, being used to control the camping lamp.

Working procedure:

When you press the switch of K, it will connect with the 12V power, after playing down voltage by R1 and steadying voltage by D2, the IC will be supplied a steady power.

Meanwhile, the LED of D1 will work on, it means the power is already put through.

Then, IC will produce a pulse signal, after being amplified by N1, RF signal of 315MHZ will be radiated to control the camping lamp.

Instruction :

1. Put 4pcs AA dry batteries into lamp.
2. Press power button, 20+3 LEDs ON, remote control ON.
3. Press remoter 1st time, 3 LEDs ON.
4. Press remoter 2nd time, 20+3 LEDs ON.
5. Press remoter 3rd time, all LEDs OFF.
6. Press remoter 4th time, repeat press remote 1st time step.
7. Press power button again, power OFF.
