

### **FCC/IC ID Label Location Justification**

With this letter, Medeco Security Locks provides justification and requests approval to place the FCC and IC ID#'s in the host User Manual, and not on the module or host, due to space limitations.

KDB784748 D01 Labelling Part 15 &18 Guidelines v08 Section 2.2 states:

If the labelling area is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labelled with the FCC ID. If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual.

Medeco Security Locks would like to exercise the option to place the FCC and IC ID's in the User Manual, not on the module nor on the host, as both are too small to effectively include this information. Please see the photographs on the following pages for the overall dimensions of the module and host.

Notes:

- The FCC ID is visible at the time of purchase as it is placed on the host box label.
- The ISED HVIN will be listed in the User Manual.

The following text will be in the User Manual:

Contains:

FCC ID: VR3-20736

IC: 7465A-20736

HVIN: EA-020736

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.
