

BAC-200D USER GUIDE

FCC Statement This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

LIMITED LIABILITY

Manufacturers, importers and sellers will not take responsibility for the accident injury or the damage caused by incorrect operation.

This handbook contains the existing functions of the product. More functions or updated technology will be added in the future. Please understand that all of these changes will be no need to inform you.

SAFE DRIVING

Using mobile phone while driving may distract the driver's attention, thereby increasing the possibility of accidents.

To use the mobile phone while driving, please try to reduce the talking time, no record and no read. Before answering the call, please observe the surrounding environment, such as bad weather (storms, fog, etc.). While traffic peak, baby in car or difficulties in vehicle, please leave the road and park the car before calling or answering the phone. Please remember that answering the phone is not the most important, safety is the most important! Please abide the local law.
