[Detailed Operating Guide]

1. Power On and Off

When BAC-500 is under OFF mode, press multifunction key on the headset and hold for 5 seconds. The blue LED starts to flash for three times. The device can automatically connect to the last used mobile phone after powering on.

When BAC-500 is under STANDBY mode, press multifunction key and hold for 5 seconds. The red indicator flashes for 4 times indicating the device is off.

2. Pairing and Connecting

Under power off state, press the multifunction key and hold for 5 seconds, until the red and blue indicator flashes alternately, indicating the device is ready for pairing.

- 1) Activate two *Bluetooth* mobile phones and search *Bluetooth* devices. The devices in range will be found after searching completed;
- 2) Select "BAC-500" on one of the mobile phones, and enter "0000" for pairing. The blue led flashes when connected successfully;
- 3) Press the multifunction key once, the red and blue indicator will flash alternately, indicating it's ready for pairing again;
- 4) Activate the other mobile phone and follow the same step to pair it with the device. The blue indicator is on when connected. (As for some brands, it may need to effect the bluetooth connection with the device again on the first mobile, as it could be off after the second one has been connected.)
- 5) Now the device has been paired with two mobile phones successfully. The blue indicator flashes every 5 seconds. Now you can enjoy wireless communication.

Note: The bluetooth connection of one of the mobiles will be disconnected during the the other one is having a call, and will be automatically connected when the call ended.

3. Incoming Call

Under STANDBY mode, a ring from your car speaker indicating the coming call.

4. Answering/Ending A Call
