1. Getting to know your Shogo

1.1 What's included in Shogo Package

1.2 Shogo overview

1.3 Start up your Shogo

1. Connect the Power Adaptor

2. Pull down the stand and push into the lock position to stand horizontally

4. Turn power switch "ON"

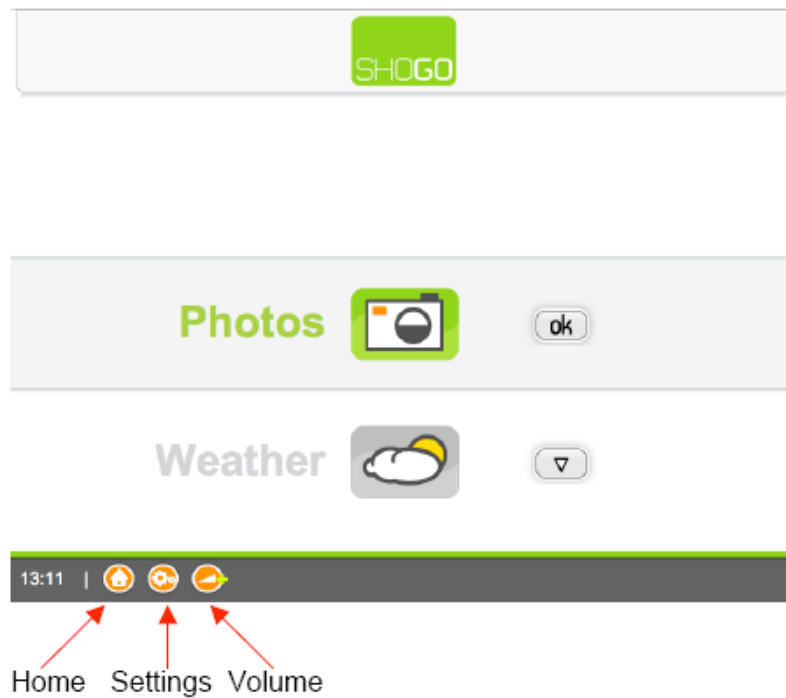

3. Take out Ethernet cable, connect one end to the Ethernet connector on Shogo, the other end to your router, or ADSL router

3

An initialization process will start after Power on, follow the steps and make changes on basic settings.

After Initialization, here you can see the Home Page of Shogo

1.4 Connecting to the Internet

For first time user, it is recommended to use Ethernet connection. Your Ethernet should be automatically connected if you have connected the SHOGO to a router or ADSL router. You can also check if you have successfully connected with Ethernet by:

- Press "Settings" button on the Remote Control
- Select **Network**, then press "ok"
- Select **Ethernet Connection** by pressing "Red Action" Button
- An IP Address will be shown as above, if there is no IP address shown, your connection is not successful. Please check if you have properly connected to the router with the Ethernet cable

Connecting to WiFi network

For **WiFi Connection**, select **WiFi connection** by pressing "Blue Action" Button, then your SHOGO will start scanning available WiFi networks.

Once a wireless network is detected, The network name will be shown, press "ok" to connect to it. If there is more than one network detected, choose your own network with the "up/down" button then press "ok".

You may also need to enter a password to access your wireless network,. To enter password, a virtual keyboard will be shown. Key in your password by choosing the letters on screen with the "arrow" keys of your remote control, confirm entry of each character by pressing "ok".

Entering of Password, press actions button of your remote

- Green to switch back and forth to capital letters if needed
- Yellow to switch to numbers keyboard
- "Red" to delete an entry

After entering the password, press "Blue Action" Button to connect to the wireless network.

Shogo will confirm successful connection to your WiFi network by showing -

Wireless network setup completed.

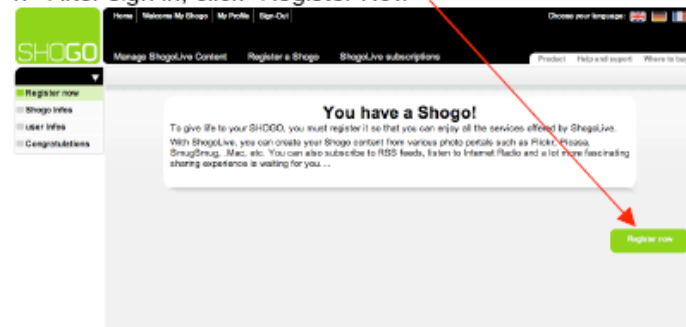

Press "Home" on the remote control to continue.

1.5 Register your Shogo

To enjoy all features of Shogo, you must register your Shogo in www.myshogo.com and subscribe to our free ShogoLive Service, the content provisioning service for Shogo.

To register your Shogo:

1. Take out the registration card, there is a serial number and a Network ID printed on it
2. Get a PC or Mac, open a web browser and go to www.myshogo.com.
3. If you are first time user, sign in as "new user", create a myshogo.com ID and your own password, this allow you to log-in myshogo.com site next time with this user ID.
4. After sign in, click "Register Now"

5. Type in the Network ID and serial number printed on the registration card

A screenshot of the 'Register your shogo' form. It has a green header. Below it, a text box says 'Serial Number can be found under your Shogo'. There are two input fields: 'Shogo Network ID*' with a placeholder showing five boxes separated by dots, and 'Serial Number*' with a single text box. A red oval highlights these two fields.

6. Give a name to your Shogo, the Shogo name is important for you to add content and be a friend of other Shogo, which someone can invite you as Shogo Friend for sharing their photos with you.
7. Complete the registration process
8. Go to "Manage ShogoLive Content" to try uploading photos from Flickr, Picasa, SmugSmug and .Mac

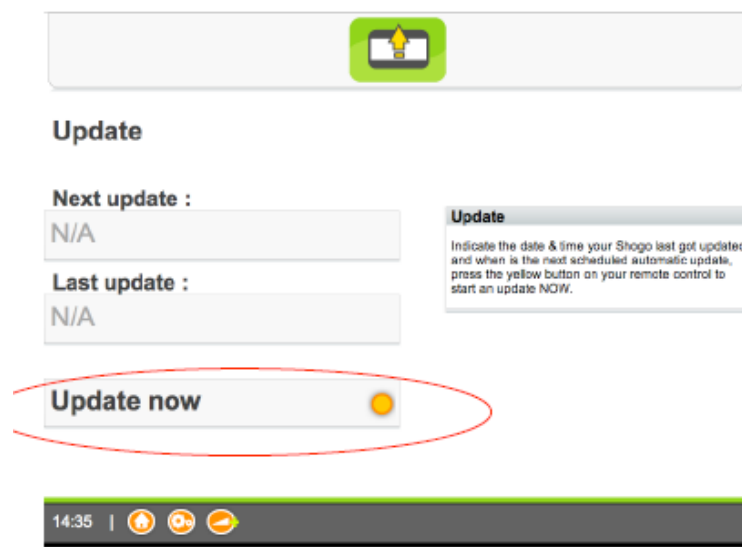

1.6 Updating Shogo Content

After registered your Shogo, conduct a content update to download contents from ShogoLive into your Shogo. After the update, you will receive weather forecast channel, ShogoLive preloaded photos album and your newly created albums and preset internet radio stations from ShogoLive.

To update Shogo Content, select "Settings" on the Remote Control, then select **Update**. Press "Yellow Action" Button and you will receive all the new albums and digital content.

Go back Home, now, you can browse all the new albums on photos, your weather forecast and internet radio stations.

There is no need to do update after set up, as your Shogo will be updated automatically everyday.

2. Viewing Pictures from Shogo

On Shogo Home, select "Photo", navigate the albums with "up/down" arrows. To preview photos inside the album, press "ok" and the "up/down" arrow to view each photos. Press "blue action" to play slideshow.

Your Shogo can view and play digital content from your local source, the memory card and USB flash drive or through the Internet with myshogo.com.

2.1 Viewing pictures from USB flash drives and Memory cards

1. Insert your memory card to the Integrated Card Reader or your USB flash drive to the USB port
2. Move the up/down button of the remote to Memory Card or USB
3. Press "ok" to preview, or "blue action" button to play slide show directly

2.2 Viewing pictures from the Internet

After updating ShogoLive content from myshogo.com, all albums in ShogoLive will be automatically created, move up/down button to navigate the albums, press "ok" to preview, or "blue action" button to play slide show directly.

3. Change Shogo Settings

3.11 Settings/ Support

The Support setting screen provides you with technical information about your Shogo that might be helpful when you request assistance to the customer service hotline.

Important information for you to get support from us includes:

- Shogo Name
- Serial Number
- Network ID

4. ShogoLive

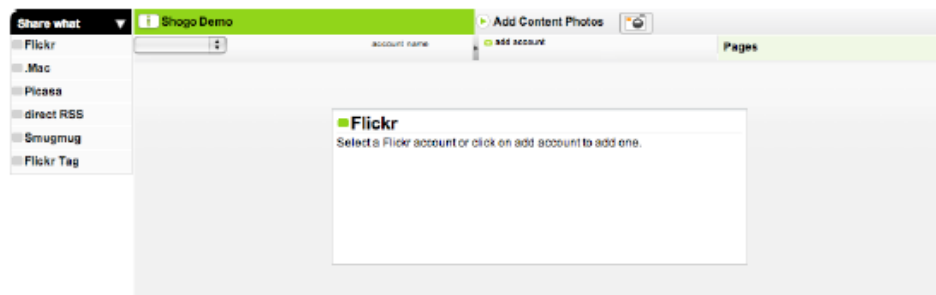

ShogoLive is a subscription service that allows user to provide content, administer and manage your Shogo. You can set up your Shogo content by adding photo albums from photo portals, such as Flickr, Picasa, SmugSmug, .Mac; connect to internet radio stations, subscribe to RSS feeds. You also get a new sharing experience by inviting your friends to be a Shogo Author that provide content for your Shogo. In addition, you can send your album from your Shogo to your friends who also own Shogos, by making them as Shogo Friend. All these exciting services are offered in ShogoLive.

To subscribe to ShogoLive Service, you must register in myshogo.com and get the myshogo.com ID. Then register your Shogo, which will create a Shogo Name and start using ShogoLive service.

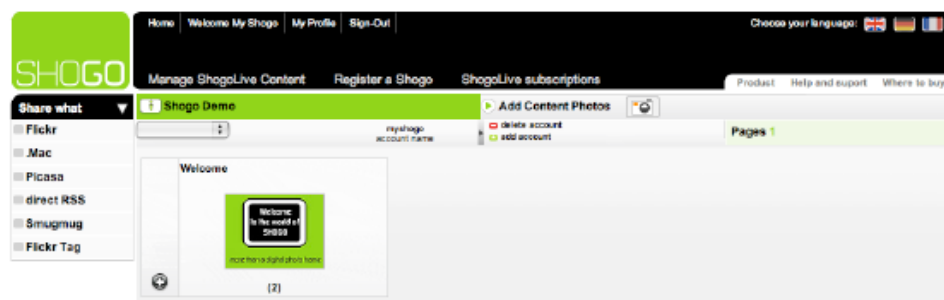

4.1 Adding new photo album

Adding new Photo Album from the Internet

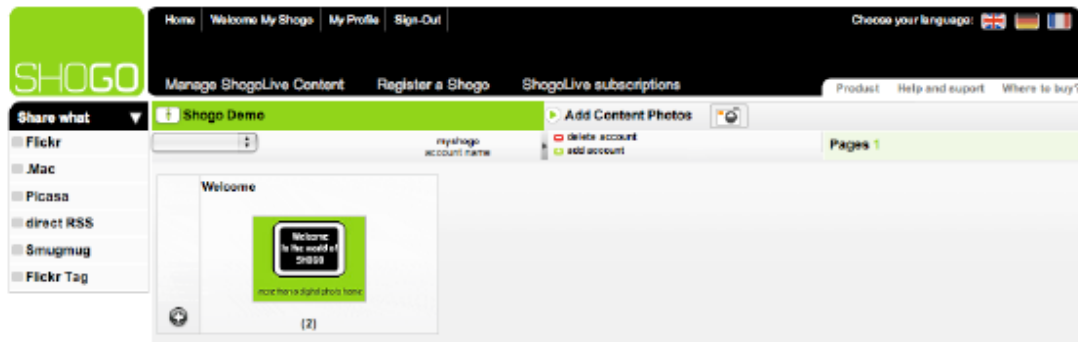

Share what – allow administrator to select what Photo Portal they want to load photos from. By default, it will be set to share Flickr account, if you want to select other portals, click on the respective portal site name on the list.

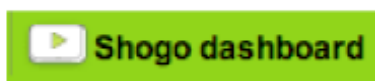

Use Flickr as an example, after you choose Flickr, a list of Flickr account will be available to choose from "select account". Choose the account and all the albums on this account will be shown, click "+" to add the album into ShogoLive.

Back to Manage ShogoLive, the new album will then be included, next time when your Shogo performs an update, the new album will be loaded into your Shogo.

4.2 Shogo dashboard

Shogo dashboard helps to monitor activities on your Shogo, it shows the number of content sources that ShogoLive has established, and the list of Shogo Authors and Shogo Friends, you will be able to add or delete Shogo Author and Shogo Friend inside the dashboard.

4.3 Adding Shogo Authors

Shogo Author is a person who has been invited by the Administrator to offer its own ShogoLive content , typically photo albums, to the Shogo.

To invite an author - Enter the author's myshogo ID, if he/she is already a myshogo.com user, or his/her email address. An invitation will be sent by the system. Once the author accepted the confirmation, his/her name will be listed in the Shogo Author list under Shogo dashboard.

By authorizing a Shogo Author, he/she will be asked to sign up myshogo.com, with his/her myshogo.com ID, he/she will be able to have restricted access to your ShogoLive service. The author can then add content to your Shogo, the next time you receive update content from ShogoLive, you will get his/her new albums automatically.

4.4 Adding Shogo Friends

Shogo Friend is another registered Shogo in myshogo.com.
By creating a "Friendship" link between your Shogo and another Shogo, you will then be able to share content directly from Shogo to Shogo without a computer.

It means when you receive on your Shogo a photo album you like, you can immediately share it with a Shogo friend at the click of a button on the frame itself, just select the album and click "send to a Shogo friend" and then select which Shogo Friend from your list you want to send the album to, that's it!

To invite a Friend – enter the serial number of your friend's shogo, he/she will receive an Email to confirm the invitation, after that, his/her Shogo name will show up in the Shogo Friend list of Shogo dashboard.

To send your album to Shogo Friend - Browse your photos on your own Shogo, you can send your album to your Shogo Friend by pressing the "Yellow Action" button on your remote, there you have a list of Shogo Friend you can choose, select your Shogo Friend you want to send this album and press ok.
