Hello,

Thank you for your help.

1. This device is not capable of VoIP. It have a option for GSM Module. When the option of GSM Module was included in this device, It is used only by Phone.
- 2.This device was finished the procedure for equipment authorization(FCC DoC). It is recorded in cover letter.
3. OK. I retested for power. and I revised the test report and 731 form.

Best Regards,
K.T. LEE

REFERENCE: JOB 219KC8

Dear MR. LEE:

This application is on hold until these questions are resolved. Please answer all question(s) together and only respond to tei@timcoengr.com. Any other method will cause **unnecessary delay**.

DO NOT HIT REPLY! Your response should be sent **ONLY** to tei@timcoengr.com. Any additional exhibits that are sent should be **UPLOADED** at our web site – please do not attach files to your email. Responses should also contain the job number, applicant name and FCC ID of the device. If an acceptable response is not received within 2 weeks the job will be closed & there will be additional charges to reopen.

Answer all questions. Be sure to number or identify your answer with the corresponding question. If you are referring to another document, be sure to give the page number and paragraph reference where your response can be found.

We are sorry for this new letter. Based upon our final review of this application we have the following questions:

1. **RF exposure:** This device appears to be capable of VoIP. It has a microphone and speaker for voice operation. Please explain. Alternatively, please provide SAR evaluation for held-to-ear operating configuration.
2. **Computer peripheral:** This device is also considered a class B computer peripheral. No information was found as to whether it was subject to the DoC or Certification procedure. Also, the label does not show any info about the DoC logo. Please include a statement of compliance in the test report or separate cover letter. The statement should describe whether the device was tested for compliance with part 15B, whether it complies, and which procedure was used for equipment authorization (DoC or Certification under JBP)
3. **Output power:** Please confirm whether the output power (80mW) was re-measured and what is the re-measured value. Please revise test report with that information.

Sincerely,

Timco Engineering, Inc.
