Radio Frequency Human Exposure Evaluation:

The highest RF output power of the EUT at 2405 MHz was measured 4.56 dBm which is less than 20mW.

Since maximum peak output power of the transmitter is $<60/f$ (GHz) mW, i.e. $2.85\text{mW} < 24.94 (=60/2405)$ mW, hence the EUT is excluded from SAR evaluation according to FCC KDB publication 447498 D01: Mobile Portable RF Exposure.
