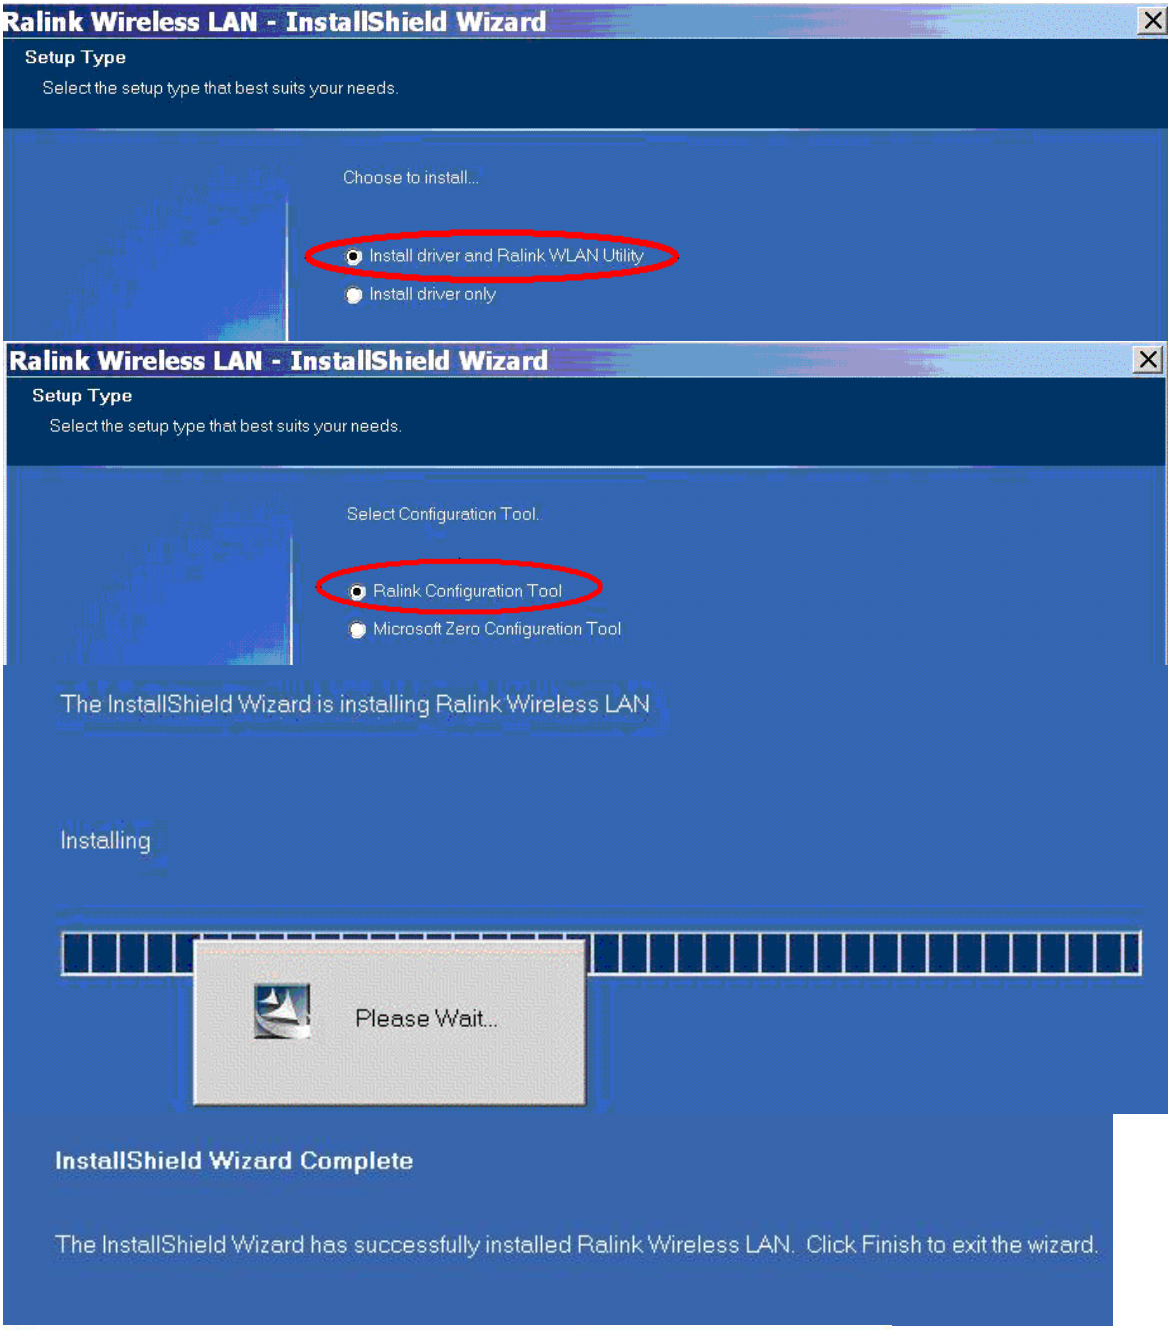
Quick User Manual Guide

Step 1: RaUI (Ralink Utility) Installation

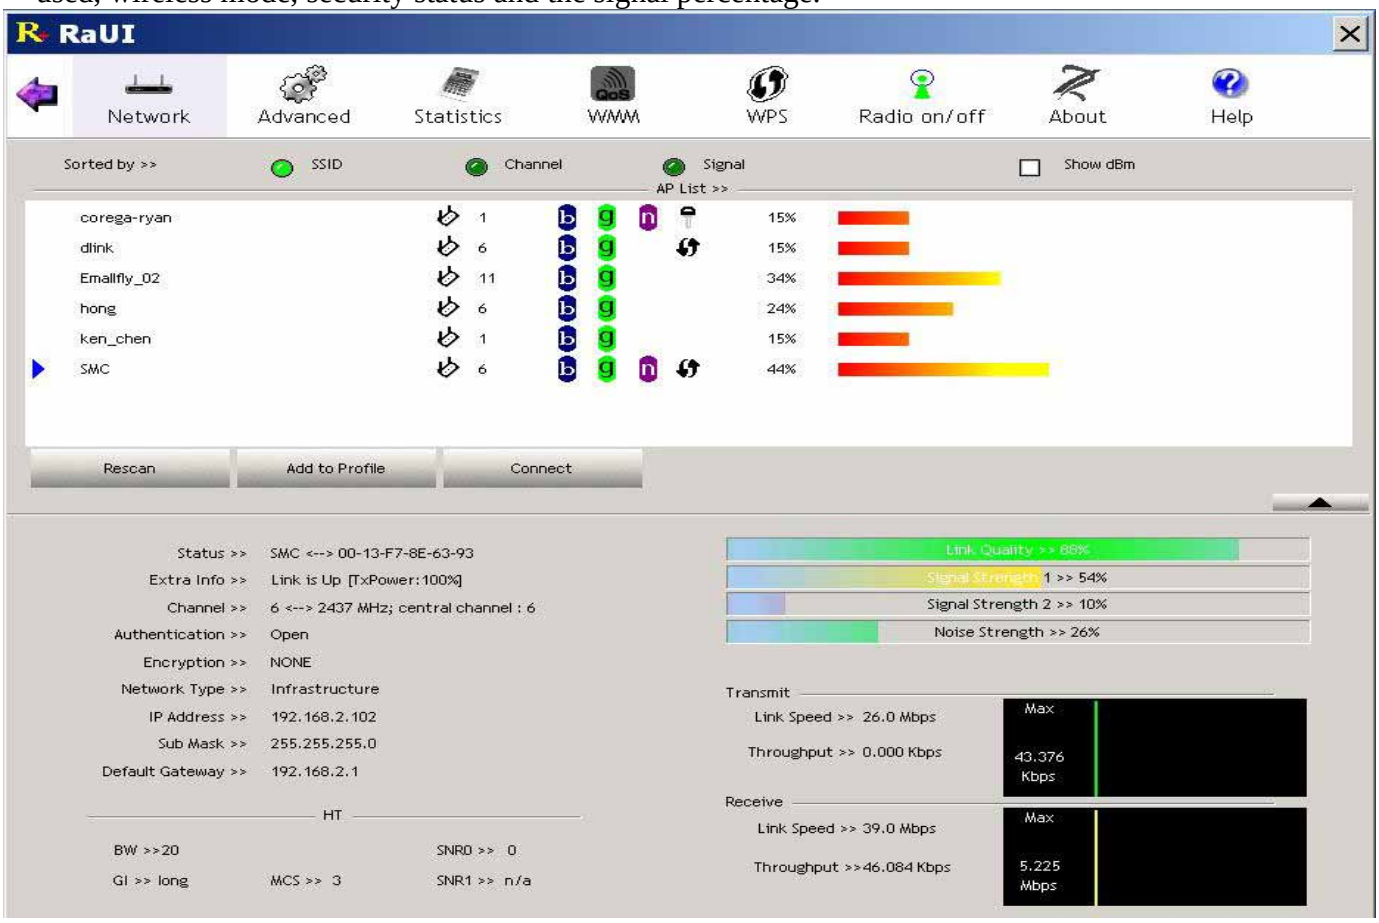


You can double click a small Ralink icon appears in the notifications area of the

taskbar to maximize the dialog box or you may also click the mouse's right button to close RaUI.

Step 2: Start RaUI (Ralink Utility)

When starting RaUI, the system will connect to the AP with best signal strength without setting a profile or matching a profile setting. The AP list includes most used fields, such as SSID, network type, channel used, wireless mode, security status and the signal percentage.



1. Functional Section:

Profile page: The list keeps a record of your favorite wireless settings or others hotspots. You can activate either one on the preference list for quick connection.
