

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Under Test (EUT) housed in a white plastic enclosure. The enclosure is open, revealing a green printed circuit board (PCB) populated with various electronic components, including a large yellow electrolytic capacitor, several integrated circuits, and surface-mount components. A black wire is connected to the board. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters for scale.
Solder Board-Component View 1	 A close-up photograph of the green PCB components, focusing on the solder joints and surface-mount components. The components include a large yellow electrolytic capacitor, several integrated circuits, and various passive components. A black wire is connected to the board. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters for scale.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, model DD274B-RF V1.0, revision 2023.11.14. The board is shown against a blue textured background with a black ruler for scale. The ruler has markings in millimeters (0 to 40 mm) and centimeters (10, 20, 30). The PCB has several components labeled: GND, 3.3, LED1, LED2, DV-U, DV-D, PB3, M-U, M-D, CH-U, STOP, CH-B, KEY, GND, and ANT. The board is oriented vertically.
Antenna View	 A photograph of the same green PCB component, model DD274B-RF V1.0, revision 2023.11.14, showing the antenna. The board is oriented horizontally. A red box highlights the antenna, which is a thin, curved wire. A red arrow points from the label "Antenna" to the antenna. A black ruler is placed vertically next to the board for scale, with markings in millimeters (0 to 100 mm) and centimeters (10, 20, 30, 40, 50, 60, 70, 80, 90, 100). The ruler is oriented vertically.
