RE: Medtronic-Zephyr BioModule Correction

FCC ID: VZ6-BH3-M1

Dear Gregory Czumak,

This memo is in response to your June 2, 2017 communication from American Certification Body (McLean, VA). Item number one identifies a discrepancy in FCC ID provided on external photos and labels. The exhibits submitted with FCC ID T7V1315 are incorrect in these external photos and labels. The FCC ID number shown in the Label Location and External Photos exhibits (i.e. T7V1315) is incorrect, and the correct FCC ID number can be seen in the Label exhibit.

Kind regards,

A handwritten signature in black ink, appearing to read "Sailor Mohler".
