

Module Certification under Section 15.212 for FCC ID: W4I-ZRFDC100-1

ZillionTV Corporation is requesting limited modular approval under Section 15.212b for the device submitted for certification as an intentional radiator under

FCC ID: W4I-ZRFDC100-1

The RF module that is submitted for certification meets all of the applicable Part 15 requirements with the exception of the shielding and power regulation requirements. However, the particular installation of the module that was submitted for testing does conform to the shielding and power regulation requirements of 15.212. ZillionTV is only seeking limited approval to use this module within its own internal products; we are not seeking approval to re-sell the module to a third party equipment manufacturer. Since ZillionTV will control the end products into which the module is installed, we can certify that all such installations will comply with the shielding and power regulation requirements of 15.212.
