1. The RF exposure information/safe operating distances need to be in the user's manual.  
--Sent request to Solid. DW

2. Per section 90.543 for equipment designed to operate in 769-775MHz adjacent channel power needs to be measured.

CT – I talked to John Erhard and he mentioned per the latest draft KDB and recent FCC discussions, that ACP does not need to be performed.
