

Loner 900 Transmitter Tune-up Procedure

Document Revision History

Revision	Date	Author	Summary
1	June 2, 2014	Scott Jacobsen	Initial release for FCC/IC submission package
2	June 10, 2014	Scott Jacobsen	Add power level and tolerance

Product Identifiers

Internal Product Name: Loner 900

Model: 101505

FCC ID: W77LNR900

IC: 8255A-LNR900

Description

The radio transmitter is tested during the manufacturing process by measuring the output strength of the modulated signals at 903, 915, and 927 MHz. The unit is then given pass/fail status based on the measured output strength.

In order to pass, the unit must exhibit an output power of 27 dBm +/- 2 dB.
