Gentlemen:

We are submitting for **California Eastern Laboratories, a MeshConnect ZICM357SP0-1C Zigbee Module, Model Number: ZICM357SP0-1**, with an **FCC ID: W7Z-ZICM357SP0** for a **Class II Permissive Change** to the existing **Single Modular Approval Certification**. This request is to add 2 different external antennas as options to the original certification. The original Single Modular Approval Certification included a PCB Trace Antenna only. Because the new antennas are external, the original PCB board and transmitter technical characteristics remain unchanged. RF Conducted data would be identical to that represented in Report #17753 rev1.2 as part of the original certification. Report #17753 rev1.2 is included as part of the documentation for this Class II Permissive Change.

This unit has been tested and complies to **Part 15, Subpart C**. If there are any questions in regard to this application, please call D.L.S. Electronic Systems, Inc. at (262) 279-0210. Enclosed you will find a copy of our test report with the information and results of tests that is required under Part 15, Section 15.247.

Thank you for your assistance in this matter.

Sincerely,

William M. Stumpf
