To Whom It May Concern:

Please be advised that SentryLock, LLC attests to the information provided in the equipment certification filing for the device pursuant to OET Inquiry tracking number 741992 concerning duty cycle of the Cinterion GSM radio.

The device is used by real estate agents to download security permission information and upload access information for property showings of real estate listings that have electronic lockboxes. Between the average time of a showing and the travel time required to reach other geographically-spread listings, it is unreasonable to consider a shorter time interval between showings than 30 minutes. All of the data for a showing is transferred in a single session, and amounts to no more than 750 bytes, as verified by test logs on our server.

Sincerely,

A handwritten signature in black ink, appearing to read 'CH', with a long horizontal flourish extending to the right.

Chris Hunt
Electrical Engineer
