Model: FK610

FCC ID: WANFK610

#### Circuit Description

IC2 is audio frequency signal amplifier. Stereo signal input from 3.5mm stereo plug to volume controller (VR1). Stereo signal through volume controller (VR1) to IC2 directly. Signal will enlarged to L& R speakers (Sound).

#### Ground Circuit

USB Jack provided DC 5V to voltage control circuit. Power provide to IC2. IC2 is DC voltage stabilizer that can output 3V for LEDs.
