Monterey, California 93940  
831-373-2601

6/18/2008

Subject: Permanent Confidentiality request for FCC ID: WBA-010835-010914

To Whom It May Concern:

Pursuant to sections 0.457 and 0.459 of CFR 47, CyberData Corporation requests permanent confidential treatment of the following information about the 010835 LiteScape Spar (aka 010918 VoIP Card Reader) accompanying this application:

- Block Diagrams
- Parts List/Bill of Materials
- Theory of Operations
- Schematic Diagrams
- Hardware Specifications
- PCB Layouts
- Photographs of internal components\*

\*(Unit is sealed with tamper evident labels and not to be opened by unauthorized persons to include end users.)

The above materials contain trade secrets and proprietary information not customarily released to the public. The product described under FCC ID: WBA-010835-010914 represents a cryptographic product module (hardware and software in a security sealed casing).

In order to market this product as a FIPs validated / registered cryptographic device, details of it's internal structures/components cannot be released into the public domain. Release of the accompanying referenced pictures of the internal structure of the module to the general public would compromise the products FIPS validation process as would release of the other above referenced materials.

Respectfully,

Christopher Elliott  
Compliance Engineer
