Software Defined Radio KDB 442812

Date: 2018-7-6
Federal Communications Commission Authorization and Evaluation Division
FCC ID: WBV-AP630
ATTESTATION

FCC ID: WBV-AP630
Product: Wireless Access point
Model: AP630

AP630 does not support peer-to-peer/ad-hoc mode
AP630 is not a software defined radio.

1. Can the RF parameters of the device be altered through software?
Yes, go to question 2.

2. Can third parties not permitted by the Commission through specific filings modify, configure, or
load different software, or make configuration settings to operate the device or host
hardware radio frequency parameters (frequency range, modulation type, maximum output
power or other radio parameters) in any other way than granted (or expected to be granted)?
No, go to question 3.

3. Is the device capable of operating in any other in any other way than granted, or will be, granted?
No, go to question 5.

4. Is this a Part 15 client device as defined in Section 15.202 (as opposed to a master device)?
Question not applicable

5. Does the manufacturer elect SDR?
No, not an SDR.

Sincerely,
