

**Re: FCC ID WCV-D350U2**

Please be advised that the original filing for this FCC ID contained an error in the upper frequency specification listing in the grant.

The original filing exhibits cover the equipment operating frequency range of 440-480MHz and the original testing was performed over the required 440 – 480MHz frequency range to demonstrate compliance to the applicable parts of FCC Rule Part 90.

The grant has been corrected to list the 480MHz equipment upper operating frequency. This replaces the original listing of 470MHz.

A handwritten signature in black ink, appearing to read 'J. T. Bellan'.
