

Battery requirement

4 x AA alkaline or Ni-Cd batteries for vehicle.

1 x 9V 6LR61 battery for controller.

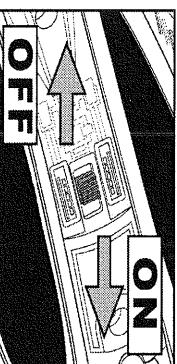

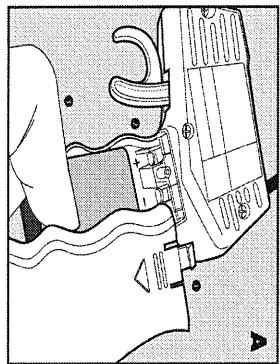

Batteries are not included in this package.

Battery Installation Controller

1. Press and pull the battery door downwards to open.

2. Take out battery compartment (A) according to the polarity symbols (+ and -) marked inside (A).

3. Replace the battery door (A) marked inside (A).

Vehicle

1. Make sure the ON/OFF switch on the vehicle is turned to the OFF position. (B)

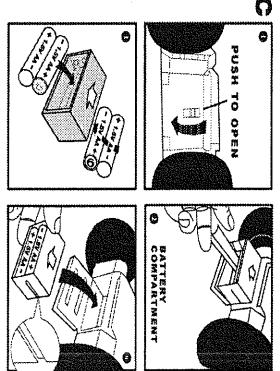

2. Push knob at rear of vehicle to unlock battery door. (C)

3. Take out battery compartment. (C)

4. Install 4 AA alkaline or Ni-Cd batteries into the battery compartment according to the polarity symbols (+ and -) marked inside (C).

5. Insert the battery compartment into the original position. (C)

6. Close the battery door and pull the knob back to lock it. (C)

Caution

1. You cannot operate 2 vehicles in the same area when they both have the same operating frequency.
2. The vehicle's range varies depending on surroundings and operation.
3. For maximum battery life, rest the vehicle after 15 minutes of continuous operation. A rest period of 30 minutes is recommended.
4. Do not drive the vehicle on sand, mud, snow or through puddles, or use outside if raining.
5. Do not store vehicle or controller near sources of heat or in direct sunlight for long periods.
6. Do not leave vehicle overnight as night dampness is harmful to internal mechanism.
7. If there is any indication of thunder, do not play outside.
8. Do not attempt to pick up the vehicle when in motion.
9. Keep fingers, hair and loose clothing away from the tires and wheel hub when the vehicle is switched on.
10. Vehicle can sometimes cause interference with televisions or radio reception. Move to another area if this happens.
11. Remove batteries from vehicle and controller when not in use.
12. Do not drop or attempt to crash the vehicle into walls or other obstacles.
13. Do not try to disassemble any part of the vehicle.
14. Do not use any type of chemical for cleaning purposes as the vehicle body could be damaged.
15. It is recommended that this toy and all accessories be periodically examined for potential hazards and that any potentially hazardous parts be repaired or replaced.
16. IF THIS TOY IS BEING OPERATED IN THE PRESENCE OF CHILDREN UNDER 4 YEARS OF AGE, ADULT SUPERVISION IS RECOMMENDED.

How to play

1. Switch the vehicle to "ON" position. (B)
2. Operate the vehicle with your controller. (A)
3. Turn the vehicle to the "OFF" position after operation. (B)

How to drive the Power Whip

- The controller is turned on automatically when the trigger is held down. Press or release trigger for forward, reverse, turn or flip over action. (D)

When the vehicle does not move or flip as commanded, replace the batteries in the vehicle or the controller with new ones. Let your Power Whip cool at least 10 minutes before installing new batteries.

Troubleshooting

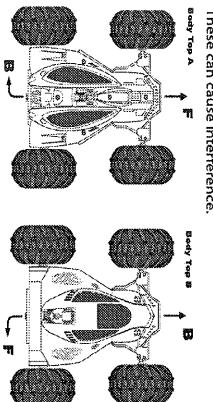

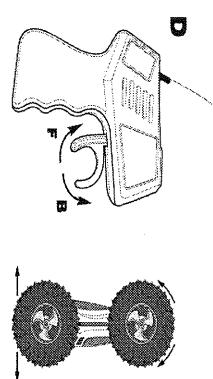

If the vehicle does not react:

- Is the switch on the vehicle turned to on?
- Has the batteries been inserted correctly?
- Are the battery contacts bent or dirty?
- Are the batteries exhausted or faulty?

If the vehicle does not react correctly:

- Are the batteries weak?
- Have the vehicle's wheels picked up lint, hair, threads or dust?
- Carefully remove such materials from the wheel bearings.
- Are there other radio controlled vehicles being used in the same area, perhaps using the same frequency?
- Are there metal girls or fence nearby?
- These may cause the vehicle to act in an uncontrolled way.
- Are walkie talkies or CB radios being used in the area?

These can cause interference.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
