Federal Communications Commission
Authorization and Evaluation Division

Confidentiality Request regarding application for certification of FCC ID: WDL16P

Pursuant to Sections 0.457 and 0.459 of the Commission's Rules, we hereby request confidential treatment of information accompanying this application as outlined below:

Locator Systems International Schematics A182 and associated block Diagrams, Tuning Procedures and Internal Photos.

We request that the internal photos of our consumer device be held confidential because the device is sealed and disassembling of the housing would destroy the product. The housing is permanently bonded shut. If the housing is forced open then it would destroy the antenna and the circuit board.

The antenna design of our radio equipment is sensitive proprietary information. It would be damaging to our business to have it freely available online.

The above materials contain trade secrets and proprietary information not customarily released to the public. The public disclosure of these materials may be harmful to the applicant and provide unjustified benefits to its competitors.

The applicant understands that pursuant to Section 0.457 of the Rules, disclosure of this application and all accompanying documentation will not be made before the date of the Grant for this application.

Andrew Loen, P.Eng.
