

Operation Principle

1. LED indicator.
2. 32.768 KHz and 7.6 MHz crystal.
3. Audio signal input to FM transmitter circuit.
4. MCU control PLL (XN31202) to set the frequency.
5. The Frequency rang is: 88.1-107.9MHz.
6. Power supply: DC 12V car's power source or DC 3V battery.
7. Antenna is printing antenna.
