

## **Circuit Description**

1. U5-AML6210A is master controller of the digital photo frame, the Y1 is generated the 27MHz clock signal to it, user operating the mouse via key-press, and it will play, and to connect the computer via USB port.
2. The LCD is an analog devices, and display beautiful photo. The size of LCD is 7" or 8.5 ".
3. The power supply is DC 12V by power adapter, and the input voltage DC 12V is convert to DC 3.3V and 5V via IC U1 and U2 of power circuit.
