

Description

1, Wireless communication

The voting machine receiver's wireless communication electric circuit is also use wireless prosperous times company's 2.4G the ZIGBEE wireless communication module, what its core part uses was CHIPCON Corporation's CC2430 chip, in CC2430 integrated 2.4G the ZIGBEE communication circuit and a 51 essence monolithic integrated circuit.

2 , Power

Receiver various part needs after the power source uses 5V which passes through 3.3V LDO, provides to various part.
