**Overall Assessment Letter for CPE722**  
**FCC id: WIN-CPE722**

I have reviewed this application and find it compliant.

This is an application for a broadband desktop terminal operating at 698 MHz – 746 MHz.

Please note the following:

As a result of the assessment review a parts list was provided. An updated confidentiality letter was also requested to only include those exhibits specifically allowed long-term/short-term confidentiality. The confidentiality letter was also updated to explain the extent to which the information is privileged and any resulting competitive harm disclosure could cause. For short-term confidentiality the letter was requested to be updated to include the number of days for which they require short-term confidentiality.

I underwent the FCC RF exposure training at BABT in July 2007.

Yours sincerely

Vina Kerai  
Compliance Engineer, BABT
