**Overall Assessment Letter for SODIFF BMT S7**  
**FCC id: WJG-S7**

I have reviewed this application and find it compliant. This is an application for a mobile phone supporting GSM/GPRS. The phone supports 850 MHz and 1900 MHz frequency range in both GSM and GPRS modes. The phone additionally supports the DCS 1800 band; however this band is not applicable as it is not operational in North America.

As a result of the assessment review several exhibits were required to be re-submitted. Block diagrams were requested to be updated. The test set-up exhibit did not originally clearly show the antenna and this has subsequently been provided.

The test reports were updated to include power source information as well as new plots for certain tests. Various exhibits were subsequently obtained relating to the Bluetooth transmitter and antenna requirements.

I underwent the FCC RF exposure evaluation training at BABT in July 2007.

Yours sincerely

Vina Kerai  
Compliance Engineer
